as part of the skills selection and sustainment s3 program this research evaluated the potential effectiveness of spatial psychomotor and leadership scales as additional selection criteria for the excellence in armor eia program the s3 predictor tests were administered to 1 642 one station unit training osut soldiers at

the fort knox reception station in addition 479 19k m1 tank crewmen osut soldiers were given an engagement tank gunnery test on the high fidelity institutional conduct of fire trainer i coft the i coft test included offensive and defensive engagements fired in normal and degraded operational modes the primary analysis evaluated i coft speed and accuracy as a function of s3 spatial psychomotor scores the s3 spatial psychomotor tests were a strong predictor of simulated tank gunnery performance yielding a correlation of 54 with i coft speed accuracy the 2 1 2 month interval between the predictor and criterion tests suggests that the relationship should remain stable over time and the relationship shrank only slightly when the eia soldiers were given additional training the results indicate that including the s3 tests in the eia selection process would result in eia graduates with stronger gunnery skills keywords personnel selection gunnery prediction unit conduct of fire trainer performance human sdw
