a call for landscape architects to leave the office and return to the garden addressing one of the most repressed subjects in landscape architecture this book could only have been written by someone who is both an experienced gardener and a landscape architect with overgrown julian raxworthy offers a watershed work in the tradition of ian mcharg anne whiston spirn kevin lynch and j b jackson as a discipline landscape architecture has distanced itself from gardening and landscape architects take pains to distinguish themselves from gardeners or landscapers landscape architects tend to imagine gardens from the office representing plants with drawings or other simulations whereas gardeners work in the dirt in real time planting pruning and maintaining in overgrown raxworthy calls for the integration of landscape architecture and gardening each has something to offer the other landscape architecture can design beautiful spaces and gardening can enhance and deepen the beauty of garden environments over time growth says raxworthy is the medium of garden development landscape architects should leave the office and go into the garden in order to know growth in an organic

nonsimulated way raxworthy proposes a new practice for working with plant material that he terms the viridic after the tectonic in architecture from the latin word for green with its associations of spring and growth he builds his argument for the viridic through six generously illustrated case studies of gardens that range from formal to informal approaches from a sixteenth century french renaissance water garden to a scottish poet scientist s marginal garden barely differentiated from nature raxworthy argues that landscape architectural practice itself needs to be gardenized brought back into the field he offers a manifesto for the viridic that casts designers and plants as vegetal partners in a renewed practice of landscape gardening
