this important book presents developments in a remarkable field of inquiry in statistical probability theory the stress strength model many papers in the field include the enigmatic words p x

shanti s gupta has made pioneering contributions to ranking and selection theory in particular to subset selection theory his list of publications and the numerous citations his publications have received over the last forty years will amply testify to this fact besides ranking and selection his interests include order statistics and reliability theory the first editor s association with shanti gupta goes back to 1965 when he came to purdue to do his ph d he has the good fortune of being a student a colleague and a long standing collaborator of shanti gupta the second editor s association with shanti gupta began in 1978 when he started his research in the area of order statistics during the past twenty years he has collaborated with shanti gupta on several publications we both feel that our lives have been enriched by our association with him he has indeed been a friend philosopher and guide to us

fuzzy set theory and advanced mathematical applications contains contributions by many of the leading experts in the field including coverage of the mathematical foundations of the theory decision making and systems science and recent developments in fuzzy neural control the book supplies a readable practical toolkit with a clear introduction to fuzzy set theory and its evolution in mathematics and new results on foundations of fuzzy set theory decision making and systems science and fuzzy control and neural systems each chapter is self contained providing up to date coverage of its subject audience an important reference work for university students and researchers and engineers working in both industrial and academic settings

this book is the outcome of a nato advanced study institute on pattern recog nition theory and applications held in spa balmoral belgium in june 1986 this institute was the third of a series which started in 1975 in bandol france at the initia tive of professors k s fu and a whinston and continued in 1981 in oxford uk with professors k s fu j kittler and l f pau as directors as early as in 1981 plans were made to pursue the series in about 1986 and possibly in belgium with professor k s fu and the present editors as directors unfortunately ie sort en decida autrement professor fu passed away in the spring of 1985 his sudden death was an irreparable loss to the scientific community and to all those who knew him as an inspiring colleague a teacher or a dear friend soon after josef kittler and i decided to pay a small tribute to his memory by helping some of his plans to materialize with the support of the nato scientific affairs division the institute became a reality it was therefore but natural that the proceedings of the institute be dedicated to him the book contains most of the papers that were presented at the

institute papers are grouped along major themes which hopefully represent the major areas of contem porary research these are 1 statistical methods and clustering techniques 2 probabilistic relaxation techniques 3 from markovian to connectionist models 4

this monograph is written for advanced master s students ph d students and researchers in mathematical statistics and decision theory it should be useful not only as a basis for graduate courses seminars ph d programs and self studies but also as a reference tool attheveryleast readersshouldbefamiliar withbasicconceptscoveredin both advanced undergraduate courses on probability and statistics and int ductory graduate level courses on probability theory mathematical statistics and analysis most statements and proofs appear in a form where standard arguments from measure theory and analysis are su cient when additional information is necessary technical tools additional measure theoretic facts and advanced probabilistic results are presented in condensed form in an pendix in particular topics from measure theory and from the theory of weak convergence of distributions are treated in detail with reference to m ern books on probability theory such as billingsley 1968 kallenberg 1997 2002 and dudley 2002 building on foundational knowledge this book acquaints readers with the concepts of classical nite sample size decision theory and modern asymptotic decision theory in the sense of lecam to this end systematic applications to the elds of parameter estimation testing hypotheses and selection of po lations are included some of the problems contain additional information in order to round o the results whereas other problems equipped with so tions have a more technical character the latter play the role of auxiliary results and as such they allow readers to become familiar with the advanced techniques of mathematical statistics

survey sampling theory and applications offers a comprehensive overview of survey sampling including the basics of sampling theory and practice as well as research based topics and examples of emerging trends the text is useful for basic and advanced survey sampling courses many other books available for graduate students do not contain material on recent developments in the area of survey sampling the book covers a wide spectrum of topics on the subject including repetitive sampling over two occasions with varying probabilities ranked set sampling fays method for balanced repeated replications mirror match bootstrap and controlled sampling procedures many topics discussed here are not available in other text books in each section theories are illustrated with numerical examples at the end of each chapter theoretical as well as numerical exercises are given which can help graduate students covers a wide spectrum of topics on survey sampling and statistics serves as an ideal text for graduate students and researchers in survey sampling theory and applications contains material on recent developments in

survey sampling not covered in other books illustrates theories using numerical examples and exercises

multi objective optimization mo is a fast developing field in computational intelligence research giving decision makers more options to choose from using some post analysis preference information there are a number of competitive mo techniques with an increasingly large number of mo real world applications multi objective optimization in computational intelligence theory and practice explores the theoretical as well as empirical performance of mos on a wide range of optimization issues including combinatorial real valued dynamic and noisy problems this book provides scholars academics and practitioners with a fundamental comprehensive collection of research on multi objective optimization techniques applications and practices
