zygmunt bauman s new book is a brilliant exploration from a sociological point of view of the taboo subject in modern societies death and dying the book develops a new theory of the ways in which human mortality is reacted to and dealt with in social institutions and culture the hypothesis explored in the book is that the necessity of human beings to live with the constant awareness of death accounts for crucial aspects of the social organization of all known societies two different life strategies are

distinguished in respect of reactions to mortality one the modern strategy deconstructs mortality by translating the insoluble issue of death into many specific problems of health and disease which are soluble in principle the post modern strategy is one of deconstructing immortality life is transformed into a constant rehearsal of reversible death a substitution of temporary disappearance for the irrevocable termination of life this profound and provocative book will appeal to a wide audience it will also be of particular interest to students and professionals in the areas of sociology anthropology theology and philosophy

a valuable guide to major issues in the field Gareth Morgan University of York the handbook of organization studies completes the trilogy begun by two previous pathbreaking handbooks March's handbook of organizations 1965 and Nystrom and Starbuck's handbook of organizational design 1981 like the earlier two handbooks the editors have recruited an international group of up and coming junior scholars as well as seasoned veterans and the result is stunning a gold mine of ideas I wholeheartedly recommend this book Howard E. Aldrich Kenan Professor of Sociology University of Northern Carolina at Chapel Hill a marvellous collection of up to date scholarship on organization studies from a whole array of perspectives a must for any organization researcher's bookshelf Koya Azumi Professor of Sociology International Christian University Tokyo the handbook of organization studies provides a much needed synthesis of the literature and knowledge about organizations and organizing I recommend it as an essential reference book for business schools as well as social science departments Professor Jean Claude Thoenig Insead Fontainebleau France this book is the most significant contribution to the study of organizations to have appeared in one volume since the classic handbook of organizations which James March edited thirty years ago this handbook of organization studies should remain relevant for at least as long as its predecessor John Child Guinness Professor of Management Studies The Judge Institute of Management Studies University of Cambridge the handbook of organization studies is a stunning accomplishment the volume forces relics of an earlier era like me to rethink the fields of organizations and organization studies it captures the exciting differences that are part of our literature in one place the volume undoubtedly will stimulate new enquiries which will require another such handbook in another three decades Richard H. Hall Distinguished Service Professor Department of Sociology and Management State University of New York Albany this book will stimulate many exciting conversations among readers that would not have occurred without it it is creative in design and conception and the quality is superb definitely it will appeal to those who wish to celebrate the diversity of perspectives and issues in the field and outflank those who wish to imagine that there is nothing of value outside the mainstream Professor John M. Jermier University of South Florida Tampa this unique handbook presents a major retrospective and prospective overview of the field of organization studies drawing on the talents of an outstanding team of international contributors the editors have assembled assessed and synthesized the key strands in past and current theory the text moves from the general to the specific from the past to the present and from the present to the future addressing the established traditions as well as newer foci of inquiry it examines the questions that the *fin de siècle* poses for organizations and for ourselves as organization members and researchers central to the enterprise has been a concern to reflect and honour the manifest diversity of the field including recognition of the extent to which the very notion of a single field of organization studies is itself debated while also directing attention to the points of intersection and potential dialogue across the numerous conversations that make up this area of study
