this essay sheds light on what are tariffs explicates how the imposition of tariffs adversely impacts an economy demystifies how the imposition of tariffs can increase the unemployment rate in an economy and elucidates why tariffs should be abolished in an economy succinct stated tariffs are evisceration fees that are imposed by bureaucratic apparatuses in a controlled market economy in a controlled market economy tariffs are paid by the importers of products the importers of products are typically companies in a controlled market economy the importers of products do not receive anything for paying tariffs furthermore in this controlled market economy there are an exorbitant amount of evisceration fees that are imposed by bureaucratic apparatuses which people who work real private sector jobs based on voluntary demand pay and do not receive anything for paying it is more cumbersome for a person to be able to augment his standard of living if he lacks purview over how all of his hard earned money is expended companies that acquiesce to paying tariffs on their purchase orders are at a high probability to indirectly pass on the cost of paying tariffs on their purchase orders to the members of their target market by significantly amplifying the prices of their products when companies indirectly pass on the cost of paying tariffs on their purchase orders

to the members of their target market by significantly amplifying the prices of their products then they often do so in a manner that allows them to at least maintain their profit margin per product sold companies often prefer to not elicit an extremely low profit margin per product sold if companies were to have an extremely low profit margin per product sold it then can undermine their net income potential by maintaining a high profit margin per product sold it is less cumbersome for companies to be able to furnish massive compensations to their executives less arduous for companies to be able to furnish sizeable retainer fees to their external directors and less cumbersome for companies to maximize the wealth of their shareholders furthermore by maintaining a high profit margin per product sold companies have more capital to earmark into research and development efforts and expansion pursuits the imposition of tariffs adversely impacts an economy in a multitude of disparate ways the imposition of tariffs can reduce the standard of living in contexts in which it culminates in companies indirectly passing on the cost of paying tariffs on their purchase orders to the members of their target market by significantly amplifying the prices of their products when companies opt to indirectly pass on the cost of paying tariffs on their purchase orders to the members of their target market by significantly amplifying the prices of their products it then can concomitantly amplify the cost of living it is calamitous for the cost of living to be exorbitant when the cost of living significantly amplifies it then can render it more cumbersome for people who are part of the real private sector workforce to be able to afford to attain an extremely low standard of living as of august of 2025 the total cost to attain an extremely low standard of living can be eminently sizeable in order to attain an extremely low standard of living a person needs to earn enough fiat currency to at least be able to afford to not only pay the perpetually recurring room rental fee and be able to afford to not only purchase a vehicle purchase functional vehicle parts purchase a computer purchase a smartphone incessantly purchase food incessantly purchase fuel for his vehicle and incessantly purchase oil for his vehicle but also needs to earn enough fiat currency to at least be able to afford to pay the perpetually recurring exorbitant auto insurance premium pay the perpetually recurring driver

s license renewal fee pay the perpetually recurring exorbitant vehicle registration fee pay the perpetually recurring tire rotation fee pay the perpetually recurring internet subscription service fee and pay the perpetually recurring smartphone subscription service fee the imposition of tariffs can also precipitate the occurrence of inflation in an economy the occurrence of inflation in an economy is detrimental to an economy

do numbers sets and so forth exist what do mathematical statements mean are they literally true or false or do they lack truth values altogether addressing questions that have attracted lively debate in recent years stewart shapiro contends that standard realist and

antirealist accounts of mathematics are both problematic as Benacerraf first noted we are confronted with the following powerful dilemma the desired continuity between mathematical and say scientific language suggests realism but realism in this context suggests seemingly intractable epistemic problems as a way out of this dilemma Shapiro articulates a structuralist approach on this view the subject matter of arithmetic for example is not a fixed domain of numbers independent of each other but rather is the natural number structure the pattern common to any system of objects that has an initial object and successor relation satisfying the induction principle using this framework realism in mathematics can be preserved without troublesome epistemic consequences Shapiro concludes by showing how a structuralist approach can be applied to wider philosophical questions such as the nature of an object and the Quinean nature of ontological commitment clear compelling and tautly argued Shapiro's work noteworthy both in its attempt to develop a full length structuralist approach to mathematics and to trace its emergence in the history of mathematics will be of deep interest to both philosophers and mathematicians
