this volume develops an original critique of the belief that the present era of finance where finance markets dominate contemporary capitalist economies represents the best possible way of organising economic affairs in fact it is argued the ensuing economic instability and inefficiency create the preconditions for the end of the dominance of finance the end of finance develops a theory of capital market inflation rooted in the work of veblen kalecki keynes and minsky demonstrating how it disinclines productive activity on the part of firms provides only short term conditions that are propitious for privatisation and distorts monetary policy in the long term the author examines the role of pension fund schemes and financial derivatives in transmitting capital market inflation and provides a nuanced analysis of the contradictory role they play in the financial system capital market inflation is also examined in its historical context and compared with past inflations in particular the south sea and mississippi bubbles which spawned the first financial derivatives and the first privatisations this broad historical vision allows us to see these forms of inflation as temporary and provisional in character

this new book by two distinguished italian economists is a highly original contribution to our

understanding of the origins and aftermath of the financial crisis the authors show that the recent financial crisis cannot be understood simply as a malfunctioning in the subprime mortgage market rather it is rooted in a much more fundamental transformation taking place over an extended time period in the very nature of finance the end or purpose of finance is to be found in the social institutions by which the making and acceptance of promises of payment are made possible that is the creation and cancellation of debt contracts within a specified time frame amato and fantacci argue that developments in the modern financial system by which debts are securitized has endangered this fundamental credit debt structure the illusion has been created that debts are universally liquid in the sense that they need not be redeemed but can be continually sold on in increasingly extensive global markets what appears to have reduced the riskiness of default for individual agents has in fact increased the fragility of the system as a whole the authors trace the origins of this profound transformation backwards in time not just to the neoliberal reforms of the 1980s and 90s but to the birth of capitalist finance in the mercantile networks of the sixteenth and seventeenth centuries this long historical perspective and deep analysis of the nature of finance enables the authors to tackle the challenges we face today in a fresh way not simply by tinkering with existing mechanisms but rather by asking the more profound question of how institutions might be devised in which finance could fulfil its essential functions

discover the untold story of the financial thriller a genre pioneered by canadian banker turned author paul erdman from a swiss prison cell starting with the publication of the billion dollar sure thing in 1973 this book explores the genre s evolution as a popular and even vulgar genre of financialisation characterised by volatile plots centred on currency speculation where the central mystery is money not murder by contextualising the rise of financial thrillers within the dramatic events of the 1970s such as the abolition of the bretton woods system and the oil crises this book illustrates how a genre found the world of finance during a particular historical moment but also how the world of finance found its genre this compelling narrative connects the past to our present financial landscape making it essential for anyone interested in the intersection of economic literary and cultural history
