benchmarking integration in manufacturing and decentralized production management strategic aspects production planning and production scheduling each theme covers important area of present and future production management reflecting the recent trend in manufacturing toward globalization agility in variety production human centered manufacturing environment consciousness and so on we hope that this volume will emerge a lot of new ideas to reach the goal of ifip wg5 7 computer aided production management and to bridge the gap between research and industrial practice in production management systems

this practical and informative text demonstrates the importance of the relationship between a physically lean enterprise and accounting it argues that to have continued success in an increasingly competitive marketplace businesses must streamline both their physical operations and accounting methods

in recent years the situation of production enterprises has been aggravated by the change from a vendors market to a buyers market the globalisation of competition a severe market segmentation and rapid progress in product and process technologies beside cost and quality time has taken on an increasingly important role forcing enterprises to become ever more dynamic and versatile therefore in all areas of production management novel effective concepts procedures and tools have been developed in order to meet these new requirements but beyond these more technical organisational and information technology related aspects there is certainly another one which has to be considered more closely than ever before namely that of human resources is not group technology also related to group work do partners in a global network only operate according to predefined process schemes with no personal contact are the mental process models of the programmers of erp systems the same as those of the users what is the impact of human behaviour and what consequences are to be expected if organisational and individual objectives are separated and finally how do necessary technological changes affect the workforce and the individual needs and wishes of the employees

it has been said that every generation of historians seeks to rewrite what a previous generation had established as the standard interpretations of the motives and circumstances shaping the fabric of historical events it is not that the facts of history have changed no one will dispute that the battle of waterloo occurred on june 11 1815 or that the allied invasion of europe began on june 6 1944 what each new age of historians are attempting to do is to reinterpret the motives of men and the force of circumstance impacting the direction of past events based on the factual social intellectual and cultural milieu of their own generation by examining the facts of history from a new perspective today s historians hope to reveal some new truth that will not only illuminate the course of history but also validate contemporary values and societal ideals although

it is true that tackling the task of developing a new text on logistics and distribution channel management focuses less on schools of philosophical and social analysis and more on the calculus of managing sales campaigns inventory replenishment and income statements the goal of the management scientist like the historian is to merge the facts and figures of the discipline with today s organizational cultural and economic realities hopefully the result will be a new synthesis where a whole new perspective will break forth exposing new directions and opportunities
