strategy requires an ability to conceive the future see and create possibilities and focus to choose a direction

successful strategy is a mental discipline consisting of broad ranging flexible and creative thinking choosing the future will help you achieve this success by studying fundamentals such as effective group thinking knowing when to delay a decision for more information balancing contrasting modes of thought and transforming thought into action using a cycle to show the relationship among different strategic thinking tools choosing the future gives you guidance to respond to these basic questions what seems to be happening what possibilities do we face what are we going to do about it choosing the future will help you advance your thinking skills rather than telling you what to do it teaches you to use your business knowledge to discover your own ideas and strategic direction stuart wells is professor of organization and management at san jose state university where he serves as director of the center for global competitiveness and as director of the small business institute as founder of the leading edge consulting group and co founder of corporate wisdom he has worked on leadership development and strategy issues with such major corporations as clorox dupont pepsico and proctor and gamble he is the author of several books including from sage to artisan the nine roles of the value driven leader

mapping a winning strategy introduces a new mapping method for creating and executing an effective business strategy by mapping out the most effective strategy organizations can make winning operational choices in today's vuca volatile uncertain complex and ambiguous business environment

own the future of your industry with a transformational strategy designed for today's business world leaders today are inundated with strategic opportunities besieged by business disruptions and pressured to innovate to do things better faster or differently the ceo of a fortune 500 firm explains it best i am looking at 23 different strategic initiatives trying to develop and implement so many strategies is like trying to change the driver tires the oil and the bumpers paint the body and tune the engine and doing all of this on a car that's running at full speed the answer used to be found in strategy but in the past decade the commonly deployed large scale strategic exercises were largely discredited they were slow and elaborate and did not deliver the expected returns let alone help make sense of a glut of initiatives or cope with an increasingly unpredictable future the future of strategy brings strategy back from those big top down plans it answers the questions of executives facing tumultuous business conditions and rapidly shifting markets is strategy still possible yes aren't strategies outdated before they can be implemented not if they are done right rather than developing strategy aren't we better off being agile and able to capitalize on emerging trends faster

than our peers agility complements strategy it cannot replace it this book is about reversing course and repositioning strategy in its rightful place as the overarching management system the authors introduce their core methodology designed to future proof companies against the friction and fog of war that inexorably accompany changing times they synthesize three fundamental principles that when combined provide the means to reclaim strategy take direct cues from fundamental trends affecting the company going forward engage people across the company to translate these cues into strategy and effectively eliminate the handover hurdle between formulation and execution a major reason for strategy failure capture the output as competitive opportunities and manage their life cycles when some have run their course others are ready to take over strategy today requires stepping over the shadows of one's own ingrained beliefs to capture new opportunities this book reveals the inner workings of transformational strategies developed by leaders who gradually become more successful by advancing winning combinations of attitudes values habits and practices

strategy is not a modern invention it is an essential and enduring feature of human history that is here to stay in this original essay colin s gray world renowned scholar of strategic thought discusses the meaning of strategy and its importance for politicians and the military as a means of achieving desired outcomes in complex uncertain conditions drawing on a wide range of examples from the great peloponnesian war to the second world war vietnam and the ongoing conflicts in iraq and afghanistan gray ably shows how great military thinkers of the past and present have acted strategically in their various ideological political geographical and cultural contexts looking to the future he argues that strategy will continue to provide a vital tool kit for survival and security but that the global threat posed by nuclear weapons remains an on going challenge without obvious practical solutions as gray boldly asserts there is no promised land ahead only hard and dangerous times that will require us to master the theory and practice of strategy to secure our own future

a truly comparative introduction to the field of public sector management this is the perfect textbook for upper undergraduate and postgraduate students to explore the evolving landscape of public administration

this business guide presents theoretical and empirical research on the business value of information technology it and introduces strategic opportunities for using it management to increase organizational performance implementation

management is addressed with attention to customer relationship outsourcing decision support systems and information systems strategic planning domestic international and multinational business contexts are covered

strategy and defence planning meeting the challenge of uncertainty explores and examines why and how security communities prepare purposefully for their future defence professor gray argues that our understanding of human nature of politics and of strategic history does allow us to make prudent choices in defence planning

as the field of information technology continues to grow and expand it impacts more and more organizations worldwide the leaders within these organizations are challenged on a continuous basis to develop and implement programs that successfully apply information technology applications this is a collection of unique perspectives on the issues surrounding it in organizations and the ways in which these issues are addressed this valuable book is a compilation of the latest research in the area of it utilization and management

eleven stimulating essays using case studies of major cities and their schools suggest what might be done to better foster equity and diversity in educating american public schoolchildren highlighting the complications inherent in today s education system and providing a framework for grappling with these problems
