the increasing demand for energy raw materials and goods arising from world population growth the emerging concept of sustainable development is concerned with meeting such challenges the widely accepted brundtland definition of sustainable development states that it is the ability to meet the needs of the present without compromising the ability of future generations to meet their own needs the papers in this volume are from a conference organised by the university of liverpool

in september 2003 and are dedicated to the holistic study and interchange of ideas on the theory technology tools methodology for the entire product life cycle within the framework of sustainable development design and manufacture for sustainable development 2003 brings together industry leaders and the cutting edge of academic research in this critical area and includes life cycle engineering from methodology to enterprise culture teaching mechanical engineering course relating to the environment biodegradable plastics for hygienic disposable products assessment for product sustainability an exploration of the role values play in designer decision making and how this effects ecodesign outcomes laser technology applied to sustainable demolition and high energy re usable bricks sustainability principles for product design public perceptions of sustainability energy efficiency and recycling how these can inform the design process

this monograph contains a study of the global cauchy problem for the yang mills equations on  $\mathbb{R}^n$  and higher dimensional minkowski space when the initial data sets are small in the critical gauge covariant sobolev space  $\dot{H}^{n-4,2}$  regularity is obtained through a certain microlocal geometric renormalization of the equations which is implemented via a family of approximate null cronstrom gauge transformations the argument is then reduced to controlling some degenerate elliptic equations in high index and non isotropic  $L^p$  spaces and also proving some bilinear estimates in specially constructed square function spaces

surplus record is the leading independent business directory of new and used capital equipment machine tools machinery and industrial equipment listing over 110 000 industrial assets since 1924 including metalworking and fabricating machine tools lathes cnc equipment machine centers woodworking equipment food equipment chemical and process equipment cranes air compressors pumps motors circuit breakers generators transformers turbines and more over 1 100 businesses list with the surplus record november 2023 issue vol 100 no 12
