how disruptions and discontinuities caused by the introduction of new technologies often reveal
 aspects of practice not previously observed what happens in an established practice or work setting
 when a novel artifact or tool for doing work changes the familiar work routines any unexpected event
 or change or technological innovation creates a discontinuity organizations and individuals must
 reframe taken for granted assumptions and practices and reposition themselves to study innovation as
 a phenomenon then we must search for situations of discontinuity and rupture and explore them in
 depth in shifting practices giovan francesco lanzara does just that and discovers that disruptions and
 discontinuities caused by the introduction of new technologies often reveal aspects of practice not
 previously observed after discussing methodological and research issues lanzara presents two in depth
 studies focusing on processes of design and innovation in two different practice settings music
 education and criminal justice in the first he works with the music department of a major american
 university to develop music logo a computer system that allows students to explore musical structures
 with simple composition like exercises and experiments in the second he works with the italian court
 system in the design and use of video technology for criminal trials in both cases drawing on
 anecdotes and examples as well as theory and analysis he traces the new systems from design through

implementation and adoption finally lanzara considers the researcher s role and the relationship encompassing empathy vulnerability and temporality between the reflective researcher and actors in the practice setting

asks why current practices of technology negatively impact humans and the earth and how we can gain a holistic understanding so technology practices can be changed to support the environment
