pizza pez dispensers nerf balls when we give students junk to reward reading we are focusing their intention away from the act of reading and from their own independence as readers instead we can create classrooms where reading is seen as its own reward in this book esteemed researcher linda gambrell provides a research

based context for cultivating children's intrinsic motivation to read and identifies three essential principles: the arc of motivation, access, giving kids a wealth of reading materials and opportunities to discuss texts, relevance, offering high interest, moderately challenging and authentic reading experiences, choice, allowing students to self-select texts and reading activities. What exactly do those principles look like in action? Reading specialist and researcher Barbara Marinak shares the strategies and techniques that make a difference for student readers' motivation. Turning disengaged readers into passionate ones. Pizza and Pez dispensers are short-lived. Linda and Barbara write, but confident and empowered readers are likely to remain motivated for life.

This volume demonstrates how promoting children's engagement with reading can greatly enhance reading achievement. From leading literacy researchers and educators, the book illuminates what a child needs to become an engaged reader and presents a set of instructional principles designed to facilitate this goal. Helping teachers offer a coordinated emphasis on competence and motivation in reading instruction. Chapters blend research evidence with practical recommendations. Topics covered include ways to provide children with a good foundation at the word level, help if they are in trouble, ample time and materials for reading opportunities to share in a community of learners, instruction that is coherent, motivating and responsive to each child's strengths and weaknesses, school-wide coordination of instruction and continuities between home and school.

An 8-month study tracked 166 second graders of various ethnic backgrounds in an urban setting while they were being motivated to read through a literature-based reading and writing program. The classrooms in which the research was conducted used basal readers and did not have well-designed literacy centers. Collaboration was not an integral part of reading instruction during the research project. Some of these classrooms were converted into experimental classrooms. Basal-based reading instruction was supplemented with literature-based instruction. Literacy centers were created and students were given opportunities for collaborative literacy activities. Students were randomly selected for the experimental classrooms; the remaining classrooms were used as controls. On several quantitative measures of comprehension, students in the experimental classrooms performed significantly better than the others. Qualitative data were also collected: interviews, observations to measure attitudes toward traditional and experimental reading instruction to determine the types of literacy activities students in experimental rooms participated in and to identify the interactive behaviors that motivate reading and writing. Findings suggest that a good case can be made for the inclusion of literature and collaborative activities in reading instruction and that a balanced approach to reading instruction is superior to one based solely on the use of basal readers. Contains 6 tables of data, one figure and 143 references. Appendixes list storybooks used for testing and children's literature references. NKA
