this book will transform the way you think about design by showing how integral it is to our daily lives from the spoon we use

to eat our breakfast cereal to the medical equipment used to save lives john heskett goes beyond style and taste to look at how different cultures and individuals personalise objects

there are many stories we can tell about the past and we are not perhaps as free as we might imagine in our choice of which stories to tell or where those stories end john arnold s very short introduction is a stimulating essay about how we study and understand history the book begins by inviting us to think about various questions provoked by our investigation of history and explores the ways these questions have been answered in the past concepts such as causation interpretation and periodization are introduced by means of concrete examples of how historians work giving the reader a sense of the excitement of discovering not only the past but also ourselves about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

introduction 1 the information revolution 2 the language of information 3 mathematical information 4 semantic information 5 physical information 6 biological information 7 economic information 8 the ethics of information conclusion references

sample sections from the very short introductions series are presented in this encapsulation of human knowledge

what is knowledge how does it differ from mere belief do you need to be able to justify a claim in order to count as knowing it how can we know that the outer world is real and not a dream questions like these are ancient ones and the branch of philosophy dedicated to answering them epistemology has been active for thousands of years in this thought provoking very short introduction jennifer nagel considers these classic questions alongside new puzzles arising from recent discoveries about humanity language and the mind nagel explains the formation of major historical theories of knowledge and shows how contemporary philosophers have developed new ways of understanding knowledge using ideas from logic linguistics and

psychology covering topics ranging from relativism and the problem of scepticism to the trustworthiness of internet sources nagel examines how progress has been made in understanding knowledge using everyday examples to explain the key issues and debates about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

from the schools of ancient times to the present day gary thomas explores how and why education has evolved has it has examining education worldwide he explains the way schools work noting how curricula are remarkably consistent around the world delving into some of the big questions thomas explores the history of education in this very short introduction considering various styles such as progressive versus formal he also explores the ideas of some of the big theorists including piaget and vygotsky looking at different forms of education and styles of teaching he considers the ways in which education is being improved by matching styles of learning to teaching and ensuring that schools are more inclusive and meaningful for a broader range of students he finishes by considering the ways in which education may develop over the coming century about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

without writing there would be no records no history no books and no emails writing is an integral and essential part of our lives but when did it start why do we all write differently and how did writing develop into what we use today all of these questions are answered in this very short introduction starting with the origins of writing five thousand years ago with cuneiform and egyptian hieroglyphs andrew robinson explains how these early forms of writing developed into hundreds of scripts including the roman alphabet and the chinese characters he reveals how the modern writing symbols and abbreviations we take for granted today including airport signage and text messaging resemble ancient ones much more closely than we

might think about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

this is an introduction to the subject of academic theology its basic approach is interrogative raising key questions so as to lead into a range of selected topics such as knowledge community salvation god prayer and evil

for 30 years pulitzer prize winning journalist linda greenhouse chronicled the activities of the u s supreme court and its justices as a correspondent for the new york times in this very short introduction she draws on her deep knowledge of the court s history and of its written and unwritten rules to show readers how the supreme court really works greenhouse offers a fascinating institutional biography of a place and its people men and women who exercise great power but whose names and faces are unrecognized by many americans and whose work often appears cloaked in mystery how do cases get to the supreme court how do the justices go about deciding them what special role does the chief justice play what do the law clerks do how does the court relate to the other branches of government greenhouse answers these questions by depicting the justices as they confront deep constitutional issues or wrestle with the meaning of confusing federal statutes throughout the author examines many individual supreme court cases to illustrate points under discussion ranging from marbury v madison the seminal case which established judicial review to the recent district of columbia v heller 2008 which struck down the district of columbia s gun control statute and which was surprisingly the first time in its history that the court issued an authoritative interpretation of the second amendment to add perspective greenhouse also compares the court to foreign courts revealing interesting differences for instance no other country in the world has chosen to bestow life tenure on its judges the second edition of greenhouse s very short introduction tracks the changes in the court s makeup over the last eight years considers the landmark decisions of the obama and trump eras and reexamines the precarious fates of such precedents as roe v wade a superb overview packed with telling details this volume offers a matchless introduction to one of the pillars of

american government

most of us recognize that organizations are everywhere you meet them on every street corner in the form of families and shops study in them work for them buy from them pay taxes to them but have you given much thought to where they came from what they are today and what they might become in the future how and why do they have so much influence over us and what influences them how do they contribute to and detract from the meaningfulness of lives and how might we improve them so they better serve our needs and desires this very short introductions addresses all of these questions and considers many more mary jo hatch introduces the concept of organizations by presenting definitions and ideas drawn from the a variety of subject areas including the physical sciences economics sociology psychology anthropology literature and the visual and performing arts drawing on examples from prehistory and everyday life from the animal kingdom as well as from business government and other formal organizations hatch provides a lively and thought provoking introduction to the process of organization about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable
