standard characterization methods of biological cells are time consuming and may reduce cell viability by staining them with markers an alternative fast and non destructive method is developed using impedance spectroscopy which has potential applications in biology the technique is used to identify tumor cells in mice detect bacterial eye infections monitor fruit ripening and measure sweat lactate concentration in humans by using a skin sensor these applications often require a portable measurement system therefore three portable systems were designed and tested it has been shown that the method can be further improved by four terminal measurements for extension of the method in the millimeter wave frequencies full electromagnetic simulation of the chip has been carried out and electrodes and interconnections have been adjusted accordingly

this book focuses on the issue of holistic development of university students it takes a specific focus on the developmental needs of the students and the importance of the development of twenty first century skills as well as well being leadership and civic engagement in university students drawing from the case study of the leadership education and development lead program in hong kong the author outlines existing theories research findings and best practices in the promotion of university students development particularly relevant to social scientists and practitioners in higher education settings not only in hong kong and china but beyond this book is a pioneer and substantial contribution to the fields of youth studies positive psychology quality of life and well being

includes entries for maps and atlases
