endorsed by the Australian College of Critical Care Nurses (ACCCN). ACCCN is the peak professional organisation representing critical care nurses in Australia, written by leading critical care nursing clinicians Leanne Aitken, Andrea Marshall, and Wendy Chaboyer. The 4th edition of *Critical Care Nursing* continues to encourage and challenge critical care nurses and students to develop world-class practice and ensure the delivery of the highest quality care. The text addresses all aspects of critical care nursing and is divided into three sections: scope of practice, core components, and specialty practice, providing the most recent research data, procedures, and guidelines from expert local and international critical care nursing academics and clinicians. Alongside its strong focus on critical care nursing practice within Australia and New Zealand, the 4th edition brings a stronger emphasis on international practice and expertise to ensure students and clinicians have access to the most contemporary practice insights from around the world. Increased emphasis on practice tips to help nurses care for patients within critical care, updated case studies, research vignettes, and learning activities to support further learning highlights the role of the critical care nurse within a multidisciplinary environment and how they work together. Increased global considerations relevant to the international context of critical care nursing alongside its key focus within the ANZ context aligned to update NMBA RN standards for practice and NSQHS standards.

*Darwin Then and Now* is a journey through the most amazing story in the history of science, encapsulating who Darwin was, what he said, and what scientists have discovered since the publication of *The Origin of Species* in 1859. While recognized as one of the most influential individuals of the twentieth century, little is widely known about his personal life, interests, and motivations. This book explores Darwin's driving passion using Darwin's own words from *The Origin of Species*, his autobiography, *Voyage of the Beagle*, and letters in retracing the roots of evolution from the Greeks. *Darwin Then and Now* journeys through the dynamics of the eighteenth century that lead to the publication of *The Origin of Species* and the succeeding role of key players in the emerging evolution revolution. *Darwin Then and Now* examines Darwin's theory with more than three hundred quotations from *The Origin of Species*, spotlighting what Darwin said concerning the origin of species and natural selection using the American Museum of Natural History Darwin Exhibit format with over one thousand referenced quotations from scientists and historians. *Darwin Then and Now* explores the scientific evidence over the past 150 years from the fossil record, molecular biology, embryology, and modern genetics.
