globalization has been a central theme in political economic cultural and religious debates since the turn of the century while some see it as a solution others consider it the root of our problems the intensification of cultural and military

warfare and the west v the rest mentality fuels a deep seated ethnocentrism religion meanwhile faces scrutiny from various fundamentalisms and grand narratives many modern muslim thinkers are skeptical of globalization perceiving it as a homogenizing force that spreads western culture and concentrates power among a few nations they argue that islam promotes human oneness and provides an intellectual and spiritual framework for a more civilized and universal approach to globalization opposing the western centric hegemonic tendencies the goal of this book is to demonstrate that islam favors globalization in its original voluntary form as opposed to the violent imposition of the west on the east it will examine muslim responses to globalization and their attempts to find global answers to local problems in their own local regional national and global contexts several academic works have explored various aspects of globalization focusing on tensions and conflicts such as power politics religious authority and legislative issues however there is a notable absence of attention given to the islamic perspective on globalization including both appreciation and critique this book addresses this gap by offering not only a muslim critique of globalization but also a broader framework for understanding islam s unique perspective on globalization does globalization support the inclusivity that islam advocates how does islam fit into the globalization era what impact and influence may muslims have on the future of globalization what unique prospects does globalization provide muslims and the islamic faith is islamic revivalism a reaction to globalization alternatives to globalization could exist what kind of structure will the islamic globalization paradigm have in addition to addressing these questions the book attempts to provide a theoretical framework for islamic globalization which incorporates the shuratic practice and the vision of an international community extending beyond the arabs and non arabs this underscores the importance of historical contexts for contemporary actions and beliefs in the process the book attempts to extend the debate on islam and globalization by mapping out the effects of globalization on various aspects of muslim culture

the handbook of ordinary differential equations exact solutions methods and problems is an exceptional and complete reference for scientists and engineers as it contains over 7 000 ordinary differential equations with solutions this book contains more equations and methods used in the field than any other book currently available included in the handbook are exact asymptotic approximate analytical numerical symbolic and qualitative methods that are used for solving and analyzing linear and nonlinear equations the authors also present formulas for effective construction of solutions and many

different equations arising in various applications like heat transfer elasticity hydrodynamics and more this extensive handbook is the perfect resource for engineers and scientists searching for an exhaustive reservoir of information on ordinary differential equations

in this illuminating book esteemed scholars examine how islamic finance guided by strong ethical and moral principles can help to create a more just and sustainable global economy the book argues that islamic finance which is rooted in social justice and responsibility holds the potential to provide inclusive forward looking financial models
