this book can be used by b e computer science b tech i t m tech m sc and m c a students for their curriculum independent learners will also find the book self explanatory providing a wealth of information and detail supplementary material can be accessed by following the weblinks given in the book

the numeric values retrieved from a data warehouse may be difficult for business users to interpret and may even be interpreted incorrectly therefore in order to better understand numeric values business users may require an interpretation in meaningful non numeric terms however if the transition between non numeric terms is crisp true values cannot be measured and a smooth transition between classes may no longer be possible this book addresses this problem by presenting a fuzzy classification based approach for a data warehouses moreover it introduces a modeling approach for fuzzy data warehouses that makes it possible to integrate fuzzy linguistic variables in a meta table structure the essence of this structure is that fuzzy concepts can be integrated into the dimensions and facts of an existing classical data warehouse without affecting its core this allows a simultaneous analysis both fuzzy and crisp a case study of a movie rental company underlines and exemplifies the proposed approach

this book is a collection of chapters written by experts on various aspects of big data the book aims to explain what big data is and how it is stored and used the book starts from the fundamentals and builds up from there it is intended to serve as a review of the state of the practice in the field of big data handling the traditional framework of relational databases can no longer provide appropriate solutions for handling big data and making it available and useful to users scattered around the globe the study of big data covers a wide range of issues including management of heterogeneous data big data frameworks change management finding patterns in data usage and evolution data as a service service generated data service management privacy and security all of these aspects are touched upon in this book it also discusses big data applications in different domains the book will prove useful to students researchers

and practicing database and networking engineers

when we set about organizing epia 2003 in porto during the appia meeting at the previous edition of the conference epia 2001 it was decided that it would be organized by fernando moura pires fajþ e and myself we chose beja as the venue to host the conference as it provided a good support infrastructure and fernando had a good working relationship with several people at the beja polytechnic institute shortly thereafter fernando came to know that he was ailing from a disease thatwastotakehislifeinmay2003 aswithmanyotherprojectsinwhichhegot involved fernando clung to the organization of this conference with dedication and perseverance even while knowing that he might not see the results of his work epia 2003 is a tribute to his work taking up on the successful experience gained from epia 2001 we decided to structure epia 2003 as a set of ve distinct workshops roughly re ecting the panorama of ai research in portugal special thanks are due to the organizers of each workshop for the quality and timeliness of the work they carried out the conference was all the more interesting because of the eight invited p sentations and tutorials by alexander bockmayr amþ lcar cardoso dario f reano haroldboley pedrodomingos pieteradriaans veronicadahlandvitor santos costa there are short one page abstracts included in these proceedings for some of these presentations

zoological record is published annually in separate sections the first of these is comprehensive zoology followed by sections recording a year s literature relating to a phylum or class of the animal kingdom the final section contains the new genera and subgenera indexed in the volume each section of a volume lists the sections of that volume
