this ibm redpaper publication provides an overview of the  
business continuity solutions for applications running on ibm  
power ibm power servers are designed for availability reducing  
single points of failure spofs and providing redundant hardware  
components to minimize hardware failures that interrupt  
critical business functions however a highly available ha  
platform is not a guarantee of 100 availability so ibm also  
developed software and strategies to help you to continue to  
run your business in the rare event of hardware software or  
site failures that impact your production environment this  
publication provides an overview of the high availability and
