the design and functioning of an information system improve to the extent that the system can handle the questions people ask
 surprisingly however researchers in the cognitive computer and information sciences have not thoroughly examined the multitude
 of relationships between information systems and questions both question asking and answering the purpose of this book is to
 explicitly examine these relationships chapter contributors believe that questions play a central role in the analysis design and use
 of different kinds of natural or artificial information systems such as human cognition social interaction communication networks
 and intelligent tutoring systems their efforts show that data structures and representations need to be organized around the
 questioning mechanisms in order to achieve a quick retrieval of relevant useful information
