practical reasoning is not just a matter of determining how to get what you want but of working out what to want in the first place in practical induction elijah millgram argues that experience plays a central role in this process of deciding what is or is not important or worth pursuing he takes aim at instrumentalism a view predominant among philosophers today which holds that the goals of practical reasoning are basic in

the sense that they are given by desires that are not themselves the product of practical reasoning the view millgram defends is practical induction a method of reasoning from experience similar to theoretical induction what are the practical observations that teach us what to want millgram suggests they are pleasant and unpleasant experiences on the basis of which we form practical judgments about particular cases by generalizing from these judgments that is by practical induction we rationally arrive at our views about what matters learning new priorities from experience is necessary if we are to function in a world of ever changing circumstances and we need to be able to learn both from our own and from others experience it is this millgram contends that explains the cognitive importance of both our capacity for pain and pleasure and our capacity for love pleasure s role in cognition is not that of a goal but that of a guide love s role in cognition derives from its relation to our trusting the testimony of others about what does and does not matter and about what merits our desire itself a pleasure to read this book is full of inventive arguments and conveys millgram s bold thesis with elegance and force it will alter the direction of current debates on practical reasoning

the official statutes and ordinances of the university of cambridge

v 1 children and parenting v 2 biology and ecology of parenting v 3 status and social conditions of parenting v 4 applied and practical parenting

the last decade has witnessed a particularly intensive debate over methodological issues in legal theory the publication of julie dickson s evaluation and legal theory 2001 was significant as were collective returns to h l a hart s postscript to the concept of law while influential articles have been written in disparate journals no single collection of the most important papers exists this volume the first in a three volume series aims not only to fill that gap but also propose a systematic agenda for future work the editors have selected articles written by leading legal theorists including among others leslie green brian leiter joseph raz ronald dworkin and william twining and organized under four broad categories 1 problems and purposes of legal theory 2 the role of epistemology and semantics in theorising about the nature of law 3 the relation between morality and legal theory and 4 the scope of phenomena a general jurisprudence ought to address
