at a time when chinese policy makers appear to be rethinking china s historically close alliance

relationship with north korea this volume gathers a diverse collection of original essays by some of china s leading experts on north korea and china s north korea policy

to convey the image of a responsible power willing to contribute to regional stability and cooperation china has shifted from a single minded preference for bilateralism to an active participation in east asian regionalism in the recent decades this development has inspired discussions over whether a rising china could play a leadership role in building an institutionalized architecture for regional cooperation in east asia nevertheless this has not happened as east asian regional cooperation and relevant activities remain mostly ad hoc and informal especially when compared to regions such as europe to what extent has china contributed or constrained the development of regionalism in east asia what are china s desired roles and objectives in east asian regional cooperation what is the level of trust that other regional players have for china in regional cooperation this book seeks answers to these questions by exploring china s motivations and strategic calculations as well as its policy practices in east asian economic and security cooperation this book was published as a special issue of the journal of contemporary china

an examination of china s participation in the world trade organization the conflicts it has caused and how wto reforms could ease them china s accession to the world trade organization wto in 2001 was rightly hailed as a huge step forward in international cooperation however china s participation in the wto has been anything but smooth with china alienating some of its trading partners particularly the united states the mismatch between the wto framework and china s economic model has undermined the wto s ability to mitigate tensions arising from china s size and rapid growth what has to change china and the wto demonstrates that unilateral pressure by the united states and others is not the answer instead petros mavroidis and andré sapir show that if the wto enacts judicious reforms it could induce china s cooperation leading to a renewed confidence in the wto system the wto and its predecessor the general agreement on tariffs and trade are predicated on liberal domestic policies they managed the previous accessions of socialist countries and big trading nations but none were as large or powerful as china mavroidis and sapir contend that for the wto to function smoothly and accommodate china s unique geopolitical position it needs to translate some of its implicit principles into explicit treaty language to make their point they focus on two core complaints that chinese state owned enterprises soes benefit from unfair trade advantages and that domestic companies private as well as soes impose forced technology transfer on foreign companies as a condition for accessing the chinese market and they lay out specific proposals for wto reforms in an age of global trade disputes china and the wto offers a timely exploration of unprecedented challenges to the current multilateral system and fresh ideas for lasting solutions

to the pestilential climate of hang kong in a fearful manner the winter is exceedingly cold and piercing and a north east wind blows whilst a burning sun scorches the head and the transition from the burning heat of summer to the cutting blast of winter injures the most robust the intense heat of an almost vertical sun whose rays are reflected by an arid rock must necessarily prove injurious to health but when this is combined with nights of piercing cold when the thermometer falls below freezing point and water freezes in the ewer placed in a bed chamber the effect upon a european constitution must be disastrous in fact the winter in china is felt much more severely than in russia where the internal arrangements of the dwellings are such as to exclude all cold in russia warm clothing will suffice to protect those who take exercise in the open air which it will not do in china for neither furs nor cloth will exclude the cutting north east wind which chills and seems to penetrate china and the chinese about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

this engaging book challenges the traditional notion that japan was an isolated nation cut off from the outside world in the early modern era this familiar story of seclusion argues master historian marius b jansen results from viewing the period solely in terms of japan's ties with the west at the expense of its relationship with closer asian neighbors taking as his focus the port of nagasaki and its thriving trade with china in the sixteenth through the nineteenth centuries jansen not only corrects this misperception but offers an important analysis of the impact of the china trade on japan's cultural economic and political life creating a vivid portrait of a city that lived on and for foreign trade the author details nagasaki's pivotal role in importing luxury goods for a growing japanese market whose elite wanted more of everything that ships from china could bring silk sugar and ginseng were among the cargoes brought to nagasaki as well as books that by the late tokugawa period signaled the dangers of western expansionism the junks from china brought people as well as goods and the author provides clear evidence of the influence of chinese expatriates and visitors on japanese religion law and art japan's intellectuals prided themselves on their full participation in the cultural milieu of the continental mainland and for them china represented an ideal land of sages and tranquility but gradually china came to represent instead a metaphor for the other as japan's quest for a national identity intensified among the japanese a new image of their nation was beginning to emerge a japan superior to asia in general and to china in particular
