james martin one of the world s most widely respected authorities on the impact of technology on society argues that we are living at a turning point in human history we are travelling at breakneck speed into an era of extremes extremes of wealth and poverty extremes in technology extremes in globalization if we are to survive we must learn how to manage them all although we face huge challenges and conflicts martin argues that it is in the scientific breakthroughs of the new century that we will find new hope in a clear penetrating and insightful style he addresses the key questions of our age and proposes an interconnected set of solutions to its problems

the number one bestseller in twenty one bite sized lessons yuval noah harari explores what it means to be human in an age of bewilderment how can we protect ourselves from nuclear war ecological cataclysms and technological disruptions what can we do about the epidemic of fake news or the threat of terrorism what

should we teach our children the world renowned historian and intellectual yuval noah harari takes us on a thrilling journey through today s most urgent issues the golden thread running through his exhilarating new book is the challenge of maintaining our collective and individual focus in the face of constant and disorienting change faced with a litany of existential and real crises are we still capable of understanding the world we have created harari has teed up a crucial global conversation about how to take on the problems of the 21st century bill gates new york times 21 lessons is simply put a crucial book adam kay author of undoctored

this work is essentially a bibliography consisting of a representative sampling of 58 nonfiction books published in the year 2004 about african americans and about the issues that impacted and impact us viewed in the context of the canon of 664 selected from those published in the last two decades of the twentieth century the offerings of the mainstream press in the period 1939 1964 are cited as a backdrop ninety one titles published over the years 2001 to 2003 constitute the sampling for that period the surge in the publication of books in the canon at the end of the 20th century is analyzed

antimicrobial resistance can develop in any type of microbe germ microbes can develop resistance to specific medicines a common misconception is that a person s body becomes resistant to specific drugs however it is microbes not people that become resistant to the drugs drug resistance happens when microbes develop ways to survive the use of medicines meant to kill or weaken them if a microbe is resistant to many drugs treating the infections it causes can become difficult or even impossible someone with an infection that is resistant to a certain medicine can pass that resistant infection to another person in this way a hard to treat illness can be spread from person to person in some cases the illness can lead to serious disability or even death this comprehensive up to date volume aims to define issues and potential solutions to the challenges of antimicrobial resistance the chapter authors are leading international experts on antimicrobial resistance among a variety of bacteria streptococcus pneumoniae enterococci staphylococci gram negative bacilli mycobacteria species viruses hiv herpesviruses and fungi candida species fusarium etc the chapters will explore the molecular mechanisms of drug resistance the immunology and epidemiology of resistance strains clinical implications and implications on research and lack thereof and prevention and future directions this volume will also describe the steps that researchers are taking to develop molecular methods for detecting resistance develop drugs and other means to deal with newly resistant organisms a special chapter to address the issues on strategies to limit antimicrobial resistance propagation will be included in this volume

divfrom the former president of one of america s leading universities comes a comprehensive analysis of the challenges and opportunities facing higher education in america as we enter the twenty first century in a university for the twenty first century james j duderstadt discusses the array of powerful economic social and technological forces that are driving the rapid and profound change in american social institutions and universities in particular divdivchange has always characterized the university as it has sought to preserve and propagate the intellectual achievements the cultures and the values of our civilization however the capacity of the university to change through a process characterized by reflection reaction and consensus simply may not be sufficient to allow the university to control its own destiny not only will social and technical change be a challenge to the american university duderstadt says it will be the watchword for the years ahead and with change will come unprecedented opportunities for those universities with the vision the wisdom and the

courage to lead in the twenty first century the real question raised by this book is not whether higher education will be transformed but rather how and by whom *divdivjames j duderstadt* is president emeritus and university professor of science and engineering university of michigan *div*

the book explores the central question facing humanity today how can we best survive the ten great existential challenges that are now coming together to confront us besides describing these challenges from the latest scientific perspectives it also outlines and integrates the solutions both at global and individual level and concludes optimistically this book brings together in one easy to read work the principal issues facing humanity it is written for the two next generations who will have to deal with the compounding risks they inherit and which flow from overpopulation resource pressures and human nature the author examines ten intersecting areas of activity mass extinction resource depletion wmd climate change universal toxicity food crises population and urban expansion pandemic disease dangerous new technologies and self delusion which pose manifest risks to civilization and potentially to our species long term future this isn t a book just about problems it is also about solutions every chapter concludes with clear conclusions and consensus advice on what needs to be done at global level but it also empowers individuals with what they can do for themselves to make a difference unlike other books it offers integrated solutions across the areas of greatest risk it explains why *homo sapiens* is no longer an appropriate name for our species and what should be done about it

the book has been written at a time we are all experiencing change we have all been given numerous wake up calls to alter the way we live the author hopes that the guidelines set out in this book may be of some help to those who wish to read it

fao in the 21st century ensuring food security in a changing world details the current knowledge of complex and interrelated challenges that are compounding efforts to achieve global food security it discusses likely implications for the food and agriculture sector and for hunger and poverty reduction efforts including fao s role in assisting members in the coming years this book is for everyone interested in better understanding the dynamics of the current global issues and changing patterns in agriculture and natural resources
