the art of portraiture approached its apex during the sixteenth century in europe with the discovery of oil painting when the old masters developed and refined techniques that remain unsurpassed to this day the ascendance of nonrepresentational art in the middle of the twentieth century displaced these venerable skills especially in academic art circles fortunately for aspiring artists today who wish to learn the methods that allowed the old masters to achieve the luminous color and subtle tonalities so characteristic of their work this knowledge has been preserved in hundreds of small traditional painting ateliers that persevered in the old ways in this country and throughout the world coming out of this dedicated movement portrait painting atelier is an essential resource for an art community still recovering from a time when solid instruction in art technique was unavailable in our schools of particular value here is a demonstration of the old masters technique of layering paint over a toned ground surface a process that builds from the transparent dark areas to the more densely painted lights this method unifies the entire painting creating a beautiful glow that illuminates skin tones and softly blends all the color tones readers will also find valuable instruction in paint mediums from classic oil based to alkyd based the interactive principles of composition and photograph based composition and the anatomy of the human face and the key relationships among its features richly illustrated with the work of preeminent masters such as millet géricault and van gogh as well as some of

today's leading portrait artists and featuring seven detailed step by step portrait demonstrations portrait painting atelier is the first book in many years to so comprehensively cover the concepts and techniques of traditional portraiture

generations of artists have learned from how to paint like the old masters the classic volume that explores the techniques used by the great artists of the 16th and 17th centuries now watson guptill proudly presents the 25th anniversary edition each chapter is devoted to a different old master dürer titian veronese caravaggio vermeer hals rubens and rembrandt and is divided into two sections the first part describes the artist's techniques and discusses how artists can incorporate these methods within their own personal style the second part is a full color demonstration author joseph sheppard traces the artist's working sequence colors and mediums surfaces and tools as he creates a new painting with today's resurgence of interest in old master techniques this unique practical and inspiring book is sure to teach countless artists exactly how to paint like the old masters

this book traces the development of scientific conservation and technical art history it takes as its starting point the final years of the nineteenth century which saw the establishment of the first museum laboratory in berlin and ground breaking international conferences on art history and conservation held in pre world war i germany it follows the history of conservation and art history until the 1940s when from the ruins of world war ii new institutions such as the istituto centrale del restauro emerged which would shape the post war art and conservation world the book will be of interest to scholars working in art history conservation history historiography and history of science and humanities

the key to client server computing transaction processing techniques are deeply ingrained in the fields of databases and operating systems and are used to monitor control and update information in modern computer systems this book will show you how large distributed heterogeneous computer systems can be made to work reliably using transactions as a unifying conceptual framework the authors show how to build high performance distributed systems and high availability applications with finite budgets and risk the authors provide detailed explanations of why various problems occur as well as practical usable techniques for their solution throughout the book examples and techniques are drawn from the most successful commercial and research systems extensive use of compilable c code fragments demonstrate the many transaction processing algorithms presented in the book the book will be valuable to anyone interested in implementing distributed systems or client server architectures

after a single night's sleep overworked office worker song jianshu woke up in 1970s hong kong she was sent by her childhood fiancé to work as a servant in the xie family but ended up framed bound by a contract to the so called madman who loses control every month the eldest young master of the xie family xie sanye becoming his hidden wife by day she was the stepmother to his autistic little boy by night she was nothing more than the xie family's secret tool of marriage looking at the three year old child trembling in the wardrobe then at the shattered porcelain left behind from xie sanye's episodes and finally at her own body covered in bruises song jianshu a salted fish introvert corporate drone and part time content creator thought to herself thanks but i'm tearing up this dog blood rich family script the day the xie family's butler brought over a property transfer contract song jianshu was in the middle of teaching the boy how to make crafts madam xie sir asked when you'd be coming home song jianshu hid the child behind her and replied calmly when the contract expires please remind mr xie to

sign the divorce papers everyone said that when master xie had his attacks he recognized no kin yet no one knew that whenever blood red mist clouded his eyes he would bury his face into her neck breathing her in deeply and with just the faintest smile from song jianshu the tremors running down his spine would slowly inch by inch quiet down
