since the 1800 s many european americans have relied on native americans as models for
their own national racial and gender identities displays of this impulse include world s fairs
fraternal organizations and films such as dances with wolves shari m huhndorf uses cultural
artifacts such as these to examine the phenomenon of going native showing its complex
relations to social crises in the broader american society including those posed by the rise of
industrial capitalism the completion of the military conquest of native america and feminist
and civil rights activism huhndorf looks at several modern cultural manifestations of the

desire of european americans to emulate native americans some are quite pervasive as is clear from the continuing if controversial existence of fraternal organizations for young and old which rely upon indian costumes and rituals another fascinating example is the process by which arctic travelers went eskimo as huhndorf describes in her readings of robert flaherty s travel narrative my eskimo friends and his documentary film nanook of the north huhndorf asserts that european americans appropriation of native identities is not a thing of the past and she takes a skeptical look at the tribes beloved of new age devotees going native shows how even seemingly harmless images of native americans can articulate and reinforce a range of power relations including slavery patriarchy and the continued oppression of native americans huhndorf reconsiders the cultural importance and political implications of the history of the impersonation of indian identity in light of continuing debates over race gender and colonialism in american culture

the present volume is a collection of papers mainly concerning phase space analysis also known as microlocal analysis and its application to the theory of partial differential equations pdes the basic idea behind this theory at the crossing of harmonic analysis functional analysis quantum mechanics and algebraic analysis is that many phenomena depend on

both position and frequency or wave numbers or momentum and therefore must be understood and described in the phase space including time and its dual variable the energy leads to the spa time phase space from this perspective major progress has been achieved in the analysis of pdes over the last forty years based on the development of powerful tools of microlocal analysis a number of the following papers all written by leading experts in their respective elds are expanded versions of talks given at a meeting held in october 2007 at the certosa di pontignano a former 1400 cloister sprawling on the hills surrounding siena the siena workshop was in honor of ferruccio colombini on the occasion of his 60th birthday and it is our pleasure to dedicate to him this volume to which a number of friends and collaborators promptly manifested their willingness to contribute in this sense the present volume can be seen as a scienti c portrait of ferruccio many people deserve our gratitude we would like to thank all the c tributors as well as the people who took part in the workshop who made a lively mathematical attendance
