this book brings together the most recent quality research papers accepted and presented in the 3rd international conference on artificial intelligence and applied mathematics in engineering icaime 2021 held in antalya turkey between 13 october 2021 objective of the content is to provide important and innovative research for developments improvements within different engineering fields which are highly interested in using artificial intelligence and applied mathematics as a collection of the outputs from the icaime 2021 the

book is specifically considering research outcomes including advanced use of machine learning and careful problem designs on human centred aspects in this context it aims to provide recent applications for real world improvements making life easier and more sustainable for especially humans the book targets the researchers degree students and practitioners from both academia and the industry

while thin film technology has benefited greatly from artificial intelligence ai and machine learning ml techniques there is still much to be learned from a full scale exploration of these technologies in atomic layer deposition and this book provides in depth information regarding the application of ml based modeling techniques in thin film technology as a standalone approach and integrated with the classical simulation and modeling methods it is the first of its kind to present detailed information regarding approaches in ml based modeling optimization and prediction of the behaviors and characteristics of ald for improved process quality control and discovery of new materials as such this book fills significant knowledge gaps in the existing resources as it provides extensive information on ml and its applications in film thin technology offers an in depth overview of the fundamentals of thin film technology state of the art computational simulation approaches in ald ml techniques algorithms applications and challenges establishes the need for and significance of ml applications in ald while introducing integration approaches for ml techniques with computation simulation approaches explores the application of key techniques in ml such as predictive analysis classification techniques feature engineering image processing capability and microstructural analysis of deep learning algorithms and generative model benefits in ald helps readers gain a holistic understanding of the exciting applications of ml based solutions to ald problems and apply them to real world issues aimed at materials scientists and engineers this book fills significant knowledge gaps in existing resources as it provides extensive information on ml and its applications in film thin technology it also opens space for future intensive research and intriguing opportunities for ml enhanced ald processes which scale from academic to industrial applications

this research topic is in collaboration with the women in fintech and ai 2024 conference extended versions of work presented at the conference are welcome in today's rapidly evolving economic landscape the integration of artificial intelligence ai in finance and economics has become paramount ai fueled by unprecedented computational power and sophisticated algorithms has the potential to revolutionize decision making processes risk management and predictive analytics within the financial sector its adaptive capabilities and data driven insights contribute to more informed strategies driving efficiency and innovation moreover the era of big data has ushered in a new paradigm where vast and diverse datasets serve as a cornerstone for informed decision making the intersection of big data and finance allows for a granular understanding of market dynamics customer behavior and economic trends harnessing the power of big data alongside ai not only empowers financial institutions to navigate complexities but also lays the foundation for sustainable and resilient financial systems in an interconnected global economy we invite researchers and professionals to contribute to a special issue of frontiers in artificial intelligence dedicated to the intersection of artificial intelligence and economics and finance this special issue aims to explore cutting

edge advancements in various areas including but not limited to big data applied to finance natural language processing in economics digital finance and sustainability ai for financial markets and blockchain applications we welcome submissions on a wide range of topics including big data applications in finance and economics natural language processing in economic and financial contexts digital finance and its implications for sustainability artificial intelligence in financial markets blockchain applications in finance artificial intelligence for peer to peer finance network analysis in finance artificial intelligence in green finance and climate change behavioral finance
