level specifications

this is an autobiography and an exposition on the contributions and personalities of many of the leading researchers in mathematics and physics with whom dr krishna alladi professor of mathematics at the university of florida has had personal interaction with for over six decades discussions of various aspects of the physics and mathematics academic professions are included part i begins with the author s unusual and frequent introductions as a young boy to scientific luminaries like nobel laureates niels bohr murray gell mann and richard feynman in the company of his father the scientist alladi ramakrishnan also in part i is an exciting account of how the author started his research investigations in number theory as an undergraduate and how contact and collaboration with the great paul erdős as a student influenced him in his career in depth views of the institute for advanced study princeton and several major american universities are given and fascinating descriptions of the work and personalities of some field medalists and eminent mathematicians are provided part ii deals with the author s tenure at the university of florida where he initiated several programs as mathematics chair for a decade and how he has served the profession in various capacities most notably as chair of the sastra ramanujan prize committee and editor in chief of the ramanujan journal the book would appeal to academicians and the general public since the author has blended academic and scientific discussions at a non technical level with descriptions of destinations in his international travels for work and pleasure the reader is invited to dig as deep as desired and is guaranteed to be treated to whimsical stories and personal peeks at some of the great luminaries of the twentieth and twenty first centuries

dugu hong a child who grew up in a pack of wolves when he was twelve years old he met an extremely awesome master xuanyuan haotian from then on he embarked on a journey of searching for his past and conquering the world close

starting from newton s times this follow up to the author s springer book our place in the universe understanding fundamental astronomy from ancient discoveries addresses the question of our place in the universe from astronomical physical chemical biological philosophical and social perspectives using the history of astronomy to illustrate the process of discovery the emphasis is on the description of the process of how we learned and on the

exploration of the impacts of discoveries rather than on the presentation of facts thus readers are informed of the influence of science on a broad scale unlike the traditional way of teaching science in this book the author begins by describing the observations and then discusses various attempts to find answers including unsuccessful ones the goal is to help students develop a better appreciation of the scientific process and learn from this process to tackle real life problems

the book presents an alternative view of the structure of our universe an alternative view of gravity solar and relic radiation the book is refuted by the theory of the big bang dark matter and other things created for an ad hoc today s physics is trying to cover up its lack of understanding of the ongoing processes

available free with any of the three textbooks in the voyages series the 2001 update contains updated material on mars global surveyor and galileo spacecraft results the near shoemaker data from the asteroid eros the discovery of new extra solar planets and planetary systems the latest from chandra the implications of the latest cosmological measurements and more the update refers the reader back to the appropriate chapter of the main text and shows how new discoveries and ideas fit and includes both published and resources

trieste publishing has a massive catalogue of classic book titles our aim is to provide readers with the highest quality reproductions of fiction and non fiction literature that has stood the test of time the many thousands of books in our collection have been sourced from libraries and private collections around the world the titles that trieste publishing has chosen to be part of the collection have been scanned to simulate the original our readers see the books the same way that their first readers did decades or a hundred or more years ago books from that period are often spoiled by imperfections that did not exist in the original imperfections could be in the form of blurred text photographs or missing pages it is highly unlikely that this would occur with one of our books our extensive quality control ensures that the readers of trieste publishing s books will be delighted with their purchase our staff has thoroughly reviewed every page of all the books in the collection repairing or if necessary rejecting titles that are not of the highest quality this process ensures that the reader of one of trieste publishing s titles receives a volume that faithfully reproduces the original and to the maximum degree possible gives them the experience of owning the original work we pride

ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality but also providing value to every one of our readers generally trieste books are purchased singly on demand however they may also be purchased in bulk readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates
