this book presents a collection of invited works that consider constructive methods for neural networks taken primarily from papers presented at a special th session held during the 18 international conference on artificial neural networks icann 2008 in september 2008 in prague czech republic the book is devoted to constructive neural networks and other incremental learning algorithms that constitute an alternative to the standard method of finding a correct neural architecture by trial and error these

algorithms provide an incremental way of building neural networks with reduced topologies for classification problems furthermore these techniques produce not only the multilayer topologies but the value of the connecting synaptic weights that are determined automatically by the constructing algorithm avoiding the risk of becoming trapped in local minima as might occur when using gradient descent algorithms such as the popular back propagation in most cases the convergence of the constructing algorithms is guaranteed by the method used constructive methods for building neural networks can potentially create more compact and robust models which are easily implemented in hardware and used for embedded systems thus a growing amount of current research in neural networks is oriented towards this important topic the purpose of this book is to gather together some of the leading investigators and research groups in this growing area and to provide an overview of the most recent advances in the techniques being developed for constructive neural networks and their applications

the ever increasing number of rubber chemicals that are being introduced has led to an increasing rate of depletion of the first edition of dr j van alphen s book which so usefully provided chemical names trade names and the names of suppliers of a very large number of commonly used rubber additives the need for a revised edition of this valuable book original edited by rubber stichting in 1956 was recognized by shell international chemical company who was ready and willing to sponsor the necessary work to update and extend the contents of the book preparations of which following the death of dr van alphen were already taken in hand by mr r j kuipers at that time a tno rubber technologist unfortunately mr kuipers did not live to see the completion of this work and the economic technical information centre of the tno plastics and rubber research institute was prepared to undertake the extensive task of cataloguing the expanded range of rubber chemicals in the following groups largely following the original pattern set by dr van alphen the present book contains the following chapters peptizing agents vulcanizing agents accelerators activators retarders blowing agents antidegradants co agents it is gratefully acknowledged that several producers have responded to the request for data and information so that all chapters are now fully up to date
