drylands are a sizeable part of the world's potentially arable land they vary from the hyper arid regions of the classic deserts of africa and asia to the more common semi arid and sub humid areas that support extensive agricultural systems dependent on rainfall or irrigation following their successful and innovative work the economics of dryland management the editors have assembled twenty case studies from nine countries in the continents of africa asia north america

and australia they help to explore more fully the costs of land degradation and illustrate the economics of reclamation rehabilitation and prevention the cases in this book present a rich varied and readable survey of a wide range of drylands and their resources originally published in 19990

competition between firms is usually the most effective way of delivering economic efficiency and what consumers want however there is a balance to be struck firms must not be over regulated and so hampered in their development of innovative products and new strategies to compete for customers nor must they be completely free to satisfy a natural preference for monopoly which would give them higher profits and a quieter life the economic role of competition policy control of anticompetitive agreements mergers and abusive practices is to maintain this balance and an effective policy requires a nuanced understanding of the economics of industrial organization cases in european competition policy demonstrates how economics is used and sometimes abused in competition cases in practical competition policy across europe each chapter summarizes a real case investigated by the european commission or a national authority and provides a critique of key aspects of the economic analysis

the first german edition of this book appeared in 1940 since then the book has gone through five more editions and has been translated into spanish and italian the present english translation is based on the sixth german edition the author was professor of economics at the university of freiburg germany professor eucken was a student at a time when the historical school dominated the teaching of economics at the german universities although at the beginning of his career he did some work along the lines of the historical school neither the aims nor the methods of historical research the field of economics as practised by the representatives in of the historical school satisfied him and the fact that the members of this school were unable to explain the causes of economic events such as the german inflation after world war i was an added reason for him to turn to economic theory he became among german economists the foremost opponent of the historical school which he criticised in several publications through his writings and his teaching he contributed his share to the revival of interest in economic theory which was noticeable in the twenties and he was one of the few economists left in germany who helped to keep this interest alive during the thirties and during world war ii during this time he published kapitaltheoretische untersuchungen 1936 and the present volume which immediately gave rise to an extensive discussion in german economic journals

the meeting objectives included providing an overview of the current status of insecticide resistance and resistance management practices as well as of the ways in which economic principles can be applied to value insecticide susceptibility the main target audiences were national malaria control programs their implementing partner organizations and donors

this book considers three relationships law and economics economics and game theory and game theory and law economists teach lawyers that economic

principles cut across and integrate seemingly different legal subjects such as contracts torts and property correspondingly lawyers teach economists that legal rationality is a separate and distinct decision making process that can be formalized by behavioral rules that are parallel to and comparable with the behavioral rules of economic rationality that efficiency often must be constrained by legal goals such as equal protection of the laws due process and horizontal and distributional equity and that the general case methodology of economics vs the hard case methodology of law for determining the truth or falsity of economic theories and theorems sometimes conflict economics and game theory law and economics books focus on economic analysis of judges decisions in common law cases and have been mostly limited to contracts torts property criminal law and suit and settlement there is usually no discussion of the many areas of law that require cooperative action such as is needed to provide economic infrastructure control public bad type externalities and make legislation game theory provides the bridge between competitive markets and the missing discussion of cooperative action in law and economics how competitive markets are examples subset of the prisoners dilemma which explains the conflict between individual self interested behavior and cooperation both in economic markets and in legislative bodies and demonstrates the need for social infrastructure and regulation of pollution and global warming game theory and law lawsuits usually involve litigation between two parties not the myriad participants in markets so the assumption of self interest constrained by markets does not carry over to legal disputes involving one on one bargaining in which the law gives one party superior bargaining power game theory models predict the effect of different legal institutions rights and rules on the outcome of such bargaining game theory also has a natural four model framework which is used in this book to analyze the law and economics of civil obligation which consists of torts negligence contracts and unjust enrichment

contains papers that appeal to a broad and global readership in all fields of economics

4647c 5 0 13 046473 2 case karl e fair ray c principles of economics updated edition 6 e since the 6 e published many things have affected our economy the presidential election the impact of the 9 11 tragedy and the recession that we are all living through on a daily basis this updated edition provides access to the most current economic information available written by two highly respected economists and educators the book uses the stories graphs and equations approach to make economic concepts accessible and relevant to readers with various learning styles a seven part organization covers an introduction to economics foundations of microeconomics consumers and firms market imperfections and the role of government concepts and problems in macroeconomics the goods and money markets and macroeconomic analysis and the world economy for a thorough understanding of economic principles

includes annual list of doctoral dissertations in political economy in progress in american universities and colleges and the hand book of the american economic association

the economics of women men and work fifth edition defines the study of women men and work in the labor market and the household blau ferber and winkler comprehensively analyzed recent developments in the labor market and their consequences for men and women to again provide a single volume with the most current summary and synthesis of research and data on gender issues in the labor market book jacket
