this book examines how teachers and students actually go about their classroom business it carefully avoids the assumptions of policy makers and theorists about what ought to be happening and focuses on what is happening in doing so cooper and mcintyre offer a detailed look at how teachers are responding to the national curriculum a unique insight into secondary school students as learners a grounded analysis of teaching and learning strategies drawing on the psychological theories of bruner and vygotsky the book follows on from donald mcintyre s previous book making sense of teaching and will be of interest to student teachers teachers studying for advanced degrees and academics involved in teacher education

this reader friendly and accessible text introduces 50 teaching and learning approaches and explores how they work in practice by taking an honest look at the advantages and disadvantages of each one for each approach the authors include in practice examples taken from a range of teaching contexts the text also offers clear support for teachers on how they can assess learners progress when using each approach this focus on the need to see and measure the learning that is taking place supports the reader to concentrate on the learning and not be distracted with the newness of different approaches

this textbook tackles the matter of contemporary learners needs and introduces modern learning teaching and assessment methods it provides a deeper understanding of these methods so that the students and teachers can create teaching and learning opportunities for themselves and others it explores the meaning of pedagogy why it is essential and how pedagogy has evolved to take 21st century skills and learning into account this textbook showcases various modern learning teaching and assessment methods for contemporary learners in an increasingly digital environment each chapter presents insights and case studies that show how such modern methods can be applied to classrooms and how they can support the existing curriculum it shows students educators and researchers alike how to effectively make sense of and use modern learning teaching and assessment methods in everyday practice

i hope that this guide was helpful and that you gained insights on learning how to learn at the end of this book you should be equipped with the basic knowledge of how to be an effective teacher or learner this guide is certainly not an exhaustive discourse on this subject i advise further research and additional reading to access more information to bolster your knowledge author mary felton

one of the most up to date research based methods texts available today learning and teaching research based methods has two specific goals to change how

teachers think about teaching and to change how they actually teach solidly grounded in research the sixth edition describes effective teaching strategies for all p 12 students in a clear readable manner with numerous case examples and offers suggestions for applying those methods in today s diverse school environments kauchak and eggen organize their discussion around three important themes in education diversity motivation and technology

teaching learning and research in higher education offers a combination of critical perspectives and practical advice that is ideally suited for individuals interested in enhancing their practice through analysis and critique the aim is to promote a critical understanding of one s own practices to foster personal and professional formation through a reflexive engagement with one s environment and circumstances at a practical level this means to continuously think about how to adjust practice rather than following a formulaic approach derived from any particular educational theory teaching learning and research in higher education argues that academics can find space for their own agency in the midst of institutional policies and practices that serve to frame as well as delimit and constrain what counts as good academic work in teaching and research this text bridges a gap between those books that provide a high level analysis of contemporary higher education the more practical texts on how to be a good teacher in higher education and those texts which aim to improve teaching through better understanding of the learning process topical chapters include teacher learner relationship learning groups practice oriented learning teaching for diversity e learning assessment approaches to staff development quality assurance supervision and research education doing research and teaching research a must have resource for higher education professions academic developers professionals and anyone looking to improve their teaching and learning practices teaching learning and research in higher education is also appropriate for continuing and professional development courses in the uk and teaching and learning courses in the us mark tennant is dean of the university graduate school university of technology sydney cathi mcmullen is lecturer in the school of marketing and management at charles sturt university dan kaczynski is professor in the educational leadership department at central michigan university

review of the previous edition this powerful book makes many of its points through the use of case studies and examples rarely if ever has discussion of so wide a variety of approaches to learning been gathered together in a single volume british journal of educational technology the new edition of this bestselling text provides a comprehensive and accessible introduction to an array of models of teaching and learning written in a clear engaging and accessible style the authors offer a wide range of teaching strategies that have been developed polished and studied over the last thirty years rather than being formulas to be followed word for word each model draws teachers into the study of how students learn promoting reflective action research in the classroom some of the models have been proven not only to

accelerate learning but also to allow pupils to engage in alternative modes of inquiry which have been almost impossible to generate through traditional chalk and talk teaching updated features include a foreword by estelle morris a new chapter on teaching adolescents with disabilities to read a wealth of new scenarios and examples with clear guidelines for implementation a new synectics study new research and illustrations a revised picture word inductive model revisions and updates to ten chapters updated appendix on peer coaching guides models of learning tools for teaching is an essential text for trainee teachers practitioners advisors inspectors and teacher educators

contextual teaching and learning ctl is a system for teaching that is grounded in brain research brain research indicates that we learn best when we see meaning in new tasks and material and we discover meaning when we are able to connect new information with our existing knowledge and experiences students learn best according to neuroscience when they can connect the content of academic lessons with the context of their own daily lives johnson discusses the elements of the brain compatible contextual teaching and learning system making meaningful connections investing school work with significance self regulated learning collaboration critical and creating thinking nurturing the individual reaching high standards and using authentic assessment drawing on the practices of teachers in kindergarten through university johnson provides numerous examples of how to use each part of the ctl system
