on january 25 1996 the committee on youth development of the board on children youth and families convened a workshop to examine the implications of research on social settings for the design and evaluation of programs that serve youth the january workshop provided an opportunity for the committee to examine the strengths and limitations of existing research on interactions between social settings and adolescent development this research has drawn attention to the importance of understanding how when and where adolescents interact with their families peers and unrelated adults in settings such as home school places of work and recreational sites this workshop builds on previous work of the national research council and reiterates its support for integrating studies of social settings into more traditional research on individual characteristics family functioning and peer relationships in seeking to describe and explain adolescent behavior and youth outcomes not only does this report examine the strengths and limitations of research on social settings and adolescence and identify important research questions that deserve further study in developing this field but it also explores alternative methods by which the findings of research on social settings could be better integrated into the development of youth programs and services specific themes include the impact of social settings on differences in developmental pathways role expectations and youth identity and decision making skills as well as factors that contribute to variations in community context

perhaps no other challenge is more pressing in creating developmentally tentative community and society the theme of this book series than mobilizing adultstoplayactive constructiverolesinthelivesofchildrenandadolescents in a society that too easily defaults to designing programs as cure alls for meeting young people s needs particular attention must be paid to understanding and mobilizing the kind of positive relational energy that prepares each successive generation to assume its place in society although programs and institutions

certainly play important roles. The key lies in the personal commitment, involvement and investment of adults in young people's lives in mobilizing adults for positive youth development strategies for closing the gap between beliefs and behaviors. E. Gil Clary and Jean E. Rhodes have assembled the insights of leading scholars from multiple disciplines and contexts for engaging a broad cadre of adults as allies for youth development as the editors write. The question guiding the book is: how can we most effectively encourage adults both individually and collectively to begin to behave differently with respect to the young people of a community to do so consistently and to do so in a variety of ways? What is being proposed then is nothing less than a social movement that engages individuals, small groups, neighborhoods, workplaces, schools, faith communities and broader social institutions in attending to the well-being and healthy development of young people.

A team of researchers from five universities in Hong Kong have constructed a comprehensive positive youth development package for junior secondary school students in Hong Kong. This project is called PATHS: Positive Adolescent Training through Holistic Social Programs. The package focuses on various aspects of positive youth development used by more than 250 secondary schools in Hong Kong. Research has been performed on the effectiveness and educational implications of the teaching package which opened a new page of study in the field of whole person education and youth education in Chinese societies. In view of the data collected so far, the teaching package is well received by students, teachers and educators in Hong Kong. The new curriculum covered in this book is closely related to the emerging adolescent developmental issues in Hong Kong and the global contexts.

The purpose of this book is to compile and publicize the best current thinking about training and professional development for youth workers. School-age youth spend far more of their time outside of school than inside of school. The United States boasts a rich and vibrant ecosystem of out-of-school time programs and funders ranging from grassroots neighborhood centers to national boys and girls clubs. The research community too has produced some scientific consensus about defining features of high quality youth development settings and the importance of after-school and informal programs for youth. But we know far less about the people who provide support, guidance and mentoring to youth in these settings. What do youth workers do? What kinds of training, certification and job security do they have? Unlike K-12 classroom teaching, a profession with longstanding (if contested) legitimacy and recognition, youth work does not call forth familiar imagery or cultural narratives. Ask someone what a youth worker does and they are just as likely to think you are talking about a young person.

working at her first job as they are to think you mean a young adult who works with youth this absence of shared archetypes or mental models is matched by a shortage of policies or professional associations that clearly define youth work and assume responsibility for training and preparation this is a problem because the functions performed by youth workers outside of school are critical for positive youth development especially in our current context governed by widening income inequality the us has seen a decline in social mobility and an increase in income inequality and racial segregation this places a greater premium on the role of out programs in supporting access and equity to learning opportunities for children particularly for those growing up in neighborhoods of concentrated poverty fortunately in the past decade there has been an emergence of research and policy arguments about the importance of naming defining and attending to the profession of youth work a report released in 2013 by the dc children and youth investment corporation suggests employment opportunities for youth workers are growing faster than the national average and as the workforce increases so will efforts to professionalize it through specialized training and credentials our purpose in this volume is to build on that momentum by bringing together the best scholarship and policy ideas coming from in and outside of higher education about conceptions of youth work and optimal types of preparation and professional development

provides an introductory overview of the professional practice of youth work and youth development this book captures the elements that make youth work a unique and powerful experience for those working with young people topics include adolescence as a life stage historical perspectives approaches and orientations to youth work practical program and leadership strategies ethics multi culturalism policy formation professional career development and more

this volume builds understanding of practices in youth and community development that create or build social capital assets at the individual group and community levels the authors explore whether programs contribute to the development of social capital at the individual and community scales thereby fostering and enhancing positive youth development as well as community development it includes articles on defining and measuring social capital through instruments designed to document impact and also to engage program participants the authors then discuss program practices that build social capital in a wide range of youth development settings from community based service learning to 4 h community clubs finally they focus on building social capital in parti

communities with the most vulnerable youth the volume is designed to help practitioners refine their dual focus on youth and community development clarify constructs that help translate the public value of positive youth development to community stakeholders provide examples of practices that link youth and youth programs more intentionally to the social relationships that knit communities together this is the 138th volume of new directions for youth development the jossey bass quarterly report series dedicated to bringing together everyone concerned with helping young people including scholars practitioners and people from different disciplines and professions

social settings have enormous power to promote or hinder positive youth development researchers and practitioners know a great deal about features of schools and programs for youth that affect development but much less about how to transform settings to bring about these desirable features this book shows how to harness the power of settings it shifts the debate from simply enhancing youth outcomes at the individual level to improving the settings of youths daily lives the book offers researchers and practitioners blueprints for creating and changing influential settings including classrooms schools universities out of school time programs ethnic systems of supplementary education and other community based programs leading scholars in psychology education human development sociology anthropology economics law and public policy discuss a wide array of social change strategies and describe how to measure key features of settings as a target and guide for change the authors also demonstrate how larger social structures such as school districts community coalitions community data resources can support change many of the chapters describe ways to make settings work for all youth including those marginalized by reason of race ethnicity social class or sexual orientation toward positive youth development will guide researchers educators administrators and policy makers to improve schools and youth programs for all of america s youth

the first positive youth development title to focus on the role of sport this book brings together high profile contributors from diverse disciplines to critically examine the ways in which sport can be and has been used to promote youth development young people are too frequently looked upon as problems waiting to be solved from the perspective of positive youth development pyd young people are understood to embody potential awaiting development involvement with sport provides a developmental context that has been associated with pyd but negative outcomes can also arise from sport participation and school pe sport itself does not lead to pyd rather it is the manner in which sport is structured and delivered to children that influences their development positive youth development through sport

fills a void in the literature by bringing together experts from diverse disciplines to critically examine the ways in which sport can be and has been used to promote youth development

using the experience from the united states on positive youth development researchers in hong kong developed the project p a t h s trained the potential program implementers and evaluated the developed programs because of the overwhelming success of the project in hong kong the project was piloted in mainland china for several years this project supported by the tin ka ping foundation was piloted in four cities in east china shanghai suzhou changzhou and yangzhou from 2011 to 2014 in this book we present the training program in mainland china and also a leadership project for university students at the hong kong polytechnic university the chapters underscore the importance of evaluation and we hope that the findings will motivate university teachers and others to utilise positive youth development principles within and outside of hong kong

after school programs scout groups community service activities religious youth groups and other community based activities have long been thought to play a key role in the lives of adolescents but what do we know about the role of such programs for today s adolescents how can we ensure that programs are designed to successfully meet young people s developmental needs and help them become healthy happy and productive adults community programs to promote youth development explores these questions focusing on essential elements of adolescent well being and healthy development it offers recommendations for policy practice and research to ensure that programs are well designed to meet young people s developmental needs the book also discusses the features of programs that can contribute to a successful transition from adolescence to adulthood it examines what we know about the current landscape of youth development programs for america s youth as well as how these programs are meeting their diverse needs recognizing the importance of adolescence as a period of transition to adulthood community programs to promote youth development offers authoritative guidance to policy makers practitioners researchers and other key stakeholders on the role of youth development programs to promote the healthy development and well being of the nation s youth
