the great success of the first book on remote controlled miniature models has encouraged the team of authors around thorsten feuchter to build more functional road vehicles in 1 87 scale and to describe their experiences in detail again their preference is for functional models such as the heavy

duty tractor with manual gearbox the wheel loader that can do some proper excavating and the road sweeper that will make the battery hoover superfluous for model railways in the future in addition to teaching the basics such as the use of leds and muscular wire this book is particularly concerned with the steering switching and lighting of h0 vehicles the solutions presented here require a well equipped hobby workshop but some of the projects can also be realised without a lathe or milling machine over 140 illustrations and numerous sketches and tables supplement the text

trial comes from the english word to try synonymous with the german versuchen the original vehicles in the german and european truck trial championship are all about off road skill tests with the purpose of testing how to handle the vehicle the concept of the model truck trial is based on the originals as with the big ones the trucks drive a set course through the most difficult terrain in addition to the detailed description of this relatively young model sport the authors arnd bremer and milan buhmann pass on their know how of model building practice to the reader
