for the past three decades the shelly cashman series has effectively introduced computers to millions of students consistently providing the highest quality most up to date and innovative materials in computer education we are proud of the fact that our series of microsoft office 4 3 microsoft office 95 microsoft office 97 microsoft office 2000 and microsoft office xp textbooks have been the most widely used books in computer education with each new edition of our office books we have made significant improvements based on software changes and comments made by both instructors and students our microsoft office 2003 books continue with the innovation quality and reliability that you have come to expect from the shelly cashman series

the all in one k 8 toolkit for the lab specialist classroom teacher and homeschooler with a years worth of simple to follow projects integrate technology into language arts

geography history problem solving research skills and science lesson plans and units of inquiry using teacher resources that meet nets s national guidelines and many state standards the fifty five projects are categorized by subject program software and skill grade level each project includes standards met in three areas higher order thinking technology specific and nets s software required time involved suggested experience level subject area supported tech jargon step by step lessons extensions for deeper exploration troubleshooting tips and project examples including reproducibles tech programs used are kidpix all ms productivity software google earth typing software and online sites email 2 0 tools blogs wikis internet start pages social bookmarking and photo storage photoshop and celestia also included is an appendix of over 200 age appropriate child friendly websites skills taught include collaboration communication critical thinking problem solving decision making creativity digital citizenship information fluency presentation and technology concepts in short it s everything you d need to successfully integrate technology into the twenty first century classroom see the publisher s website at structuredlearning.net for free downloads and more details

part of the highly successful shelly cashman series microsoft excel 2002 introductory concepts and techniques provides step by step instructions accompanied by full color screen shots helping students learn basic excel 2002 skills quickly and easily

students will learn how to apply office 2000 skills quickly through a variety of meaningful projects such as creating a resume and managing a budget this two color text features easy to follow steps on the left and screen shots and completed projects on the right

providing practical guidance on enhancing learning through ict in science this book is made up of a series of projects that supplement augment and extend the qca ict scheme and provide much needed links with units in other subjects schemes of work it includes fact cards that support each project and clearly outline its benefits in relation to teaching and learning examples of how activities work in real classrooms links to research inspection evidence and background reading to support each project adaptable planning examples and practical ideas provided on accompanying downloadable resources this book is essential reading for all trainee and practising primary teachers

this book consists of eight chapters authored by distinguished researchers and practitioners that highlight the state of the art and recent trends in addressing the project portfolio selection and scheduling problem ppssp across a variety of domains particularly defense social programs supply chains and finance many organizations face the challenge of selecting and scheduling a subset of available projects subject to various resource and operational constraints in the simplest scenario the primary objective for an organization is to maximize the value added through funding and implementing a portfolio of projects subject to the available budget however there are other major difficulties that are often associated with this problem such as qualitative

project benefits multiple conflicting objectives complex project interdependencies workforce and manufacturing constraints and deep uncertainty regarding project costs benefits and completion times it is well known that the ppssp is an np hard problem and thus there is no known polynomial time algorithm for this problem despite the complexity associated with solving the ppssp many traditional approaches to this problem make use of exact solvers while exact solvers provide definitive optimal solutions they quickly become prohibitively expensive in terms of computation time when the problem size is increased in contrast evolutionary and memetic computing afford the capability for autonomous heuristic approaches and expert knowledge to be combined and thereby provide an efficient means for high quality approximation solutions to be attained as such these approaches can provide near real time decision support information for portfolio design that can be used to augment and improve existing human centric strategic decision making processes this edited book provides the reader with a broad overview of the ppssp its associated challenges and approaches to addressing the problem using evolutionary and memetic computing

for courses in access for windows powerpoint for windows excel for windows word for windows and microsoft office professional for windows the select lab series uses a class tested highly visual project based approach that teaches students through tasks supported by step by step instructions

this workbook provides projects that require the creation of documents forms presentations worksheets databases sites and outlook management tools for a new business

peter norton s office 2000 tutorial helps students learn to create process and present information using microsoft office 2000

contains comprehensive coverage of the as 400 and interactive processing provides a step by step introduction to programming with cobol demonstrates how cobol can be used as a language of the 90 s updated web site which contains additional information as well as changes in standards and techniques features more material on indexed and relative disk file processing and enhanced student disk which includes some extra debugging assignments and a y2k screen saver

8 1 2 x 11 180 b w photosthis title completes a trilogy covering the design and development of british fighters and bombers from the end of the biplane era to the present day this new volume again emphasizes the designs that were never flown it covers aircraft projects that were prepared from the mid 1930s onwards and that were influenced by the growing threat of another war with germany through to some projects which appeared after the war was over the latter includes early jets such as the attacker sea hawk and venom which all flew post war but were designed to wartime or immediate post war requirements among the designs featured in this book are fixed gun fighters

turret fighters twin engine cannon fighters light medium and heavy bombers torpedo bombers and flying boats as in the trilogy's first two volumes these designs are covered with detailed descriptions and data and numerous photographs of models or artists' impressions showing how these designs would have looked unlike the post-war years details of many earlier unbuilt projects have been lost but fortunately information on a great number of these has survived and this will form the most complete record to be published on these fascinating machines
