in the decision making involving biosciences and biotechnology both politicians and the general public have come to increasingly rely on different kinds of experts and specialised bodies interest groups such as industry religious authorities and consumer organisations also try to influence political decision making and the role of the media has not always been it is claimed as neutral as the public perceives it to be at the same time according to the democratic ideal ultimate power should rest with the parliamentarians and with the people who has the power in decision making in biotechnology can there be legitimate expertise in bioethics how can we improve the power balance these are some of the questions this book seeks to answer the book is divided into three parts the first part presents articles dealing with the role of biopolitics and the expert bodies in relation to the democratic ideal the second part looks at the special role of the media in relation to decision making in bioethics and biopolitics the third part of the book looks at the links between the biotechnology industry and bioethical decision making

in a world where incredible medical technologies are possible does can do mean should do why the church needs bioethics helps you understand and constructively engage bioethical challenges with the resources of christian wisdom and ministry three rich and true to life case studies illustrate the urgency of such bioethical issues as reproductive and genetic technologies abortion forgoing treatment

assisted suicide stem cell research and human enhancement technologies leading christian voices bring biblical and theological perspective to bear on the incredible medical technologies available today mobilize useful insights from health care law and business and demonstrate the powerful ways the church can make a difference through counseling pastoral care intercultural ministry preaching and education this book equips students church and lay leaders and people in health related fields with the knowledge to make faithful bioethical decisions and to help foster a world where human beings are shown respect as people created in the image of god contributors to why the church needs bioethics include leading bible and theology scholars such as d a carson and kevin vanhoozer leaders in the areas of preaching greg scharf and ethics scott rae and 15 other experts in the fields of biblical theological studies ministry communication business law healthcare and bioethics

bioethics is vitally important in our day because it represents the critical expression of interest in the proper use of medical science to provide health care secular humanism is important because it is a central factor in constructing a common morality that does not make special appeal to such things as religious assumptions the argument of this book therefore will be of profound interest to all who are concerned for the well being of humanity in today s world imagine the author says roman catholics and committed atheists disputing over proper abortion policies imagine individuals who wish to organize a for profit surrogate mother service confronting individuals who view such endeavors as exploitation of women to what moral premise do they appeal are power and influence the deciding factors or is it possible to establish certain principles to which all may appeal in answer professor engelhardt examines the various meanings of secularity and humanism clearly showing how complex they are alongside this he demonstrates the diversity of bioethics and the problems of laying a foundation for it based on these considerations he identifies which ways forward are the most promising the urgency of the task is clear new biomedical possibilities are surfacing at the very time that demands to contain health care costs pose difficult ethical problems

medical or bio ethics has in recent years been a growth industry journals centers and associations devoted to the subject proliferate medical schools seem increasingly to be filling rare positions in the humanities and social sciences with ethicists hardly a day passes without some media scrutiny of one or another ethical dilemma resulting from our new found ability to transform the natural conditions of life although bioethics is a self consciously interdisciplinary field it has not attracted the collaboration of many social scientists in fact social scientists who specialize in the study of medicine have in many cases watched its development with a certain ambivalence no one disputes the significance and often the painfulness of the issues and choices being addressed but there is something about the way these issues are usually handled which seems somehow inappropriate if not wrong headed to one trained in a discipline like sociology or history in their analyses of complex situations ethicists often appear grandly oblivious to the social and cultural context in which these occur and indeed to empirical referents of any sort nor do they seem very conscious of the cultural specificity of many of the values and procedures they utilize when making ethical judgments the unease felt by many in the social sciences was given articulate expression in a paper by renee fox and judith swazey which appeared in 1984

offers a systematic approach to the major questions of bioethics surveys and discusses these issues in a concise and consistent way providing a comprehensive overview of the pertinent scientific
