measuring project progress what we are concerned with in project management has been defined as the iron triangle of time cost and scope traditional project management methodology tends to focus on time and cost as scope is fixed isn t it but the way progress is typically reported is through the gantt or bar chart and in particular a tracking gantt chart illustrates where a project currently is against the schedule also typically the accounts department will produce reports on cost against budget but this just shows what we have spent up to the last accounting period against the total budget but this doesn t really tell us

exactly where we are in terms of progress today and where we will be at the end of the project and that is precisely why earned value management was developed earned value management earned value management evm helps us to determine the real status of a project as well as telling us how much time and money we have spent it also shows us how much we have achieved further it tells us how much we still need to do and provides a good indication of final costs and expected completion dates of the project evm builds on and therefore supports good project management practice and underpins good corporate governance its introduction can drive the cultural and organizational change key to supporting these objectives in summary it provides an objective measurement of what has been achieved on a project it enables accurate forecasting it provides project management information in a format that is easy for all stakeholders to understand and act upon it provides an early warning of problems which allows the timely identification and analysis of progress and cost issues and corrective actions to be identified it shows stakeholders whether they re getting value for money it enables detailed project comparisons across programs and portfolios it can be scaled to fit projects of all sizes and complexities it has the ability to combine measurements of scope time and cost the iron triangle in a single integrated system in summary evm provides a set of metrics that will enable you to accurately report on project progress to date and to completion in addition research has shown that the areas of planning and control are significantly improved by the use of evm and similarly using the methodology improves both scope definition as well as the analysis of overall project performance finally it has shown that the use of evm is a positive predictor of project success earned value management in easy steps covers introduction to evm key elements of evm evm project life cycle evm planning using evm evm reporting evm criteria evm lite glossary of evm terms
