urban connections in the contemporary pedestrian landscape explores the significant
physical and cultural changes in our urban areas following the implementation of
design strategies and increased pedestrian activity beginning with a history of the
urban grid the book then discusses experiential factors of pedestrianized urban
landscapes in three scales arterials collectors and locals with an emphasis on inductive
and deductive design alternatives it closely examines elements derived from current
urban pedestrian experiences including form scale surfaces and identity and provides
alternative design solutions for the future uniquely focusing on a hierarchical discussion
of the quality of contemporary landscape design applications within the urban grid and

with illustrated examples throughout the text this will be useful recommended reading for academics researchers and postgraduate students on urban landscape and design courses
