the 3 5 2 is a very dynamic and flexible system it can be an ultra attacking formation or solid defensive formation depending on how it is deployed in attack the 3 5 2 is numerically strong in the midfield and comes with the benefit of two strikers creating width in the attack is never a problem with two wingers and strikers that could also run the channels the formation is naturally set up to encourage movement off the ball with the interchanging of positions when in possession the interchanging of positions and movement off the ball allows different players the opportunity to fill different spaces making the 3 5 2 more dynamic and difficult for the opponent to predict and deal with in the modern game i personally find many advantages to playing the 3 5 2 formation due to its fluid attacking potential and less focus on keeping numbers back the defensive side of the 3 5 2 presents the formations biggest challenges yet it can also be seen as a strength if the players understand how to form a back four or five in the correct situations with only three defenders in the back covering space in deep wide areas must be addressed and dealt with effectively in order to offset the possible defensive weakness that come with three players not being able to cover the entire width of the field the coach must choose player personnel and more importantly the formations tactics wisely in this book i will cover multiple ways the 3 5 2 can be played to maximize its strengths while turning the formations possible negatives into positives when breaking down and analyzing any formation it is important to note that the difference between formations is about 10 yards in player positioning you can make an argument that most formations are similar and difficult to identify once the game has started the transition from defending to attacking and attacking to defending creates totally new shapes from the original formation the game of soccer is a free flowing game but inside that flow there must be a structure which drives individual and team decisions the coach is the one who will lay out the important tactical guidelines for the execution of the formation so it is important to note that the same formation can be carried out in many different ways depending on the coach tactics that will influence the way the formation played include things like setting a line of restraint establishing a line of confrontation identifying pressing zones outlining counter attacking areas realizing when to press or drop off addressing the overall style of soccer to be played player personnel work load location of the game weather

conditions field conditions and much more all these factors will directly influence the way a formation is played

many coaches use passing patterns and shadow play exercises on a regular basis to increase technical ability improve fitness levels stimulate movement ideas build discipline increase focus encourage coordinated timed multi player movements and establish a group passing tempo there is no doubt that passing patterns and shadow play exercises are valuable for player development however at some point it will become important to use specific patterns that directly fit the teams game model a game model is simply the way you want your team to play it involves the team s style of play identity and formation the way you train at some point should

specifically relate to the way you play training model game model this book takes the 4 2 3 1 soccer formation and provides a series of passing patterns and shadow play exercises that directly relate to the teaching of a flexible 4 2 3 1 formation when player s train using these patterns they are simulating many of the movements and passing combinations they will encounter when playing the 4 2 3 1 formation in an actual game i understand that no two coaches are the same and every coach will interpret formations in their own way unique way however i designed this book to teach the 4 2 3 1 formation in a fashion that i consider to be modern flexible and fluid the training exercises are intended to stimulate movement ideas for players by showing them the vast possibilities that are available by playing a flexible 4 2 3 1 system ultimately the goal is to encourage different players to fill different spaces though out the game so players are not just filling the same old predictable spaces assigned to them when a formation is played in a way that it is too robotic and ridged with no real freedom of movement and interchanging of positions it becomes predictable less dynamic boring and ultimately less effective i prefer to let my players operate under the general umbrella of the 4 2 3 1 formation while still allowing them the freedom to make their own movement decisions in order to exploit the opponent the exercises presented in this book will aid you in teaching the concepts and ideas needed to be successful playing a fluid and flexible version of the 4 2 3 1 formation
