this volume in the annals of discrete mathematics brings together contributions by renowned researchers in combinatorics graphs and complexity the conference on which this book is based was the fourth in a series which began in 1963 which was the first time specialists from east and west were able to come together the 1990 meeting attracted 170 mathematicians and computer scientists from around the world so this book represents an international detailed view of recent research

this volume contains the accounts of papers delivered at the nato advanced study institute on finite and infinite combinatorics in sets and logic held at the banff centre alberta canada from april 21 to may 4 1991 as the title suggests the meeting brought together workers interested in the interplay between finite and infinite combinatorics set theory graph theory and logic it used to be that infinite set theory finite combinatorics and logic could be viewed as quite separate and independent subjects but more and more those disciplines grow together and become interdependent of each other with ever more problems and results appearing which concern all of those disciplines i appreciate the financial support which was provided by the n a t o advanced study institute programme the natural sciences and engineering research council of canada and the department of mathematics and statistics of the university of calgary 111 the meeting on finite and infinite combinatorics in sets and logic followed two other meetings on discrete mathematics held in banff the symposium on ordered sets in 1981 and the symposium on graphs and order in 1984 the growing inter relation between the different

areas in discrete mathematics is maybe best illustrated by the fact that many of the participants who were present at the previous meetings also attended this meeting on finite and infinite combinatorics in sets and logic
