despite the passage of time our vision of native americans remains locked up within powerful stereotypes that s why some images of indians can be so unexpected and disorienting what is geronimo doing sitting in a cadillac why is an indian woman in beaded buckskin sitting under a salon hairdryer such images startle and challenge our outdated visions even as the latter continue to dominate relations between native and non native americans philip deloria explores this cultural discordance to show how stereotypes and indian experiences have competed for ascendancy in the wake of the military conquest of native america and the nation s subsequent embrace of native authenticity rewriting the story of the national encounter with modernity deloria provides revealing accounts of

indians doing unexpected things singing opera driving cars acting in hollywood in ways that suggest new directions for american indian history focusing on the late nineteenth and early twentieth centuries a time when according to most standard american narratives indian people almost dropped out of history itself deloria argues that a great many indians engaged the very same forces of modernization that were leading non indians to reevaluate their own understandings of themselves and their society he examines longstanding stereotypes of indians as invariably violent suggesting that even as such views continued in american popular culture they were also transformed by the violence at wounded knee he tells how indians came to represent themselves in wild west shows and hollywood films and also examines sports music and even indian people s use of the automobile an ironic counterpoint to today s highways teeming with dakota pick ups and cherokee sport utility vehicles throughout deloria shows us anomalies that resist pigeonholing and force us to rethink familiar expectations whether considering the hollywood films of james young deer or the hall of fame baseball career of pitcher charles albert bender he persuasively demonstrates that a significant number of indian people engaged in modernity and helped shape its anxieties and its textures at the very moment they were being defined as primitive these secret histories deloria suggests compel us to reconsider our own current expectations about what indian people should be how they should act and even what they should look like more important he shows how such seemingly harmless even if unconscious expectations contribute to the racism and injustice that still haunt the experience of many native american people today

it is difficult to ignore the fact that even as the united states becomes much more racially and ethnically diverse our neighborhoods remain largely segregated the 1968 fair housing act and 1977 community reinvestment act promised to end discrimination yet for millions of americans housing options remain far removed from the american dream why do most neighborhoods in american cities continue to be racially divided the problem suggests mara sidney lies with the policies themselves she contends that to understand why discrimination persists we need to understand the political challenges faced by advocacy groups who implement them in unfair housing she offers a new explanation for the persistent color lines in our cities by showing how weak national policy has silenced and splintered grassroots activists sidney explains how political compromise among national lawmakers with divergent interests resulted in housing legislation that influenced how community activists defined discrimination what actions they took and which political relationships they cultivated as a result local governments became less likely to include housing discrimination on their agendas existing laws went unenforced and racial segregation continued a former undercover investigator for a fair housing advocacy group sidney takes readers into the neighborhoods of minneapolis and denver to show how federal housing policy actually works she examines how these laws played out in these cities and reveals how they eroded activists capability to force more sweeping reform in housing policy sidney also shows how activist groups can cultivate community resources to overcome these difficulties looking across levels of government to analyze how national

policies interact with local politics in the first book to apply policy design theories of anne schneider and helen ingram to an empirical case sidney illuminates overlooked impacts of fair housing and community reinvestment policies and extends their theories to the study of local politics and nonprofit organizations sidney argues forcefully that understanding the link between national policy and local groups sheds light on our failure to reduce discrimination and segregation as battles over fair housing continue her book helps us understand the shape of the battlefield and the prospects for victory
