this work examines the problem of the middle upper paleolithic transitional industry in northern israel it has generally been accepted that no such transition occurred here nevertheless many transitional sites yield rich deposits and recent discoveries of well stratified transitional industries in the levant have led the author to reconsider this supposition if the enigmatic assemblages from northern israel share the same cultural background with the assemblages which have been derived from undisturbed layers the existence of the transitional industry in northern israel may be validated through technological analysis the author undertakes the determination of the reduction strategies and the main tool types used in various assemblages and determines that two contemporaneous traditions occur in israel the middle upper paleolithic transition evolving into an early upper paleolithic in the north and a southern transition defined by monigal as an initial upper paleolithic which evolves into the ahmarian in the south leolithic which evolves into the ahmarian in the south leolithic which evolves into the ahmarian in the south

this volume focuses on the phenomenon of the transition from the middle to the upper palaeolithic in the iberian peninsula with special reference to the site of abric romaní capellades barcelona more broadly the northern iberian sites and the theoretical and typological systematics that have been used hitherto in the study of the transitional process the core of the study is the development of the transition from the latest mousterian facies to the appearance of the earliest upper palaeolithic a secondary focus concentrates on the methods used until now to conduct similar studies

the buekk mountain region of southeast central europe has been the main area for studying transitional cultures between the middle and upper palaeolithic like that identified at the szelta cave in hungary

this collective volume offers a variety of perspectives which come together to offer a comprehensive picture of chert procurement and exploitation in prehistory in the near east and the levant the contributions include geoarchaeological and geological surveys mapping chert sources and quarry sites placed in the broader context of lithic resources and exploitation in the region case studies of specific sites and the characterization of chert samples and archaeological finds through macroscopic mineralogical and petrographic analysis they also offer studies of the raw material selection and chaîne opératoire involved in lithic production using siliceous rocks offering insights into the development of lithic technology and tool use in the region from the earliest evidence through to the role of flint and chert in the technological and economic systems of neolithic farming communities

contained in this book are the proceedings of the fundacion ramon areces international symposium concerning research in human health and evolution subject areas their combined study represents not only scientific balance but also the potential for profound novel insights on the human condition
