problem solving approaches often find a path from the givens to the unknown or from the unknown to the givens this study explores those approaches using written protocols of navy subjects while solving for the numerical value of an unknown from several knowns and a system of equations for a subset of the items solutions require subjects to retain expressions with both literals and numerals successful and unsuccessful students were similar in their preference to work backward and to use literals rather than numerals and in the efficacy of their solutions students acquired successful solution methods during instruction and used them consistently author

since the first interact conference in september 1984 the field of human computer interaction has received increasing attention from researchers and industrial practitioners the importance of the topic now being widely recognized technological developments have made it possible to seek new solutions to the problem of supporting work processes by information technology and for designing the interface between user and the machine computers have become an everyday and common tool in the work of many people this has motivated the development of an interdisciplinary field of research which now appears much more established than it was a few years ago the interact forums provide the opportunity for regular presentation and discussion of new results from research and application by bringing together the various disciplines and research approaches on a worldwide basis

introduces concepts for organizing data within a company to make it more accessible and meaningful the author explains where databases went wrong in the 1990s describes metadata based technologies and standards and illustrates the various implementation options by depicting five distinct metadata solutions for the same problem
