praise for the cancer treatment revolution a wonderful journey through modern medical science told with warmth and insight brought to life through the stories of people confronting cancer this book will inspire and educate both laymen and caregivers jerome groopman m d author of the measure of our days and the anatomy of hope and reanati

professor harvard medical school this is probably the best book on cancer that exists beautifully written and unfailingly interesting conveying a clear sense of hope for cancer patients and survivors cancer treatment has come a long way but not without intense struggles and passions which david nathan narrates from the inside as one of the leading players he explains cancer more clearly than anyone else and his portraits of great cancer doctors are sharp and unforgettable a contribution to history richard preston author of the hot zone and the demon in the freezer no one is better positioned to tell the tale of the cancer treatment revolution of the last half century than david nathan a brilliant physician scientist he has been present at the cusps of history in this life and death field the story he tells here is fascinating and his book is captivating atul gawande m d author of complications a surgeon s notes on an imperfect science and better a surgeon s notes on performance and assistant professor of surgery harvard medical school david nathan is a true storyteller in the cancer treatment revolution he tells stories that bridge cancer patients and cancer research as few others could these gripping tales will be appreciated by those who live with cancer and those who strive to create new therapies thomas cech ph d recipient of the 1989 nobel prize in chemistry and president of the howard hughes medical institute david nathan one of the nation s preeminent clinician scientists tells the stories of three cancer patients revealing compelling human facets the dedication of the remarkable teams that care for these patients and even more the bravery and fortitude of the patients and their families harold varmus m d recipient of the 1989 nobel prize in medicine president of the memorial sloan kettering cancer center and former director of the national institutes of health engaged by the compelling triumphs and tragedies of patients whose normal lives are inevitably altered by a life threatening cancer the reader of the cancer treatment revolution will easily appreciate the impact of the new cancer diagnostics and therapies compared to even relatively recent cancer treatments karen antman m d dean boston university school of medicine this personal highly readable account by one of the leaders of the cancer treatment revolution explains how the revolution has come about and how it will change the future sir paul nurse ph d president of rockefeller university and recipient of the 2001 nobel prize in medicine

in our current era of rapidly developing cancer drugs and therapies we also see improvement of cancer treatment outcomes stagnating when it comes to determining quality of life or long term survival this is because while new treatments are making small incremental progress in outcomes most cancer patients still depend on conventional methods that are both toxic and ineffective while new cancer drugs are becoming more precise or targeted less attention is being paid to the overall health and wellbeing of the patient which we propose is essential for long term cancer control and improving a patient s quality of life rx for hope backed by rigorous science and real life patient cases calls for an urgent reevaluation of the current conventional approach to cancer treatments and encourages a progressive treatment model combining metronomic low dose chemotherapy with complementary integrative medicine along with new breakthrough immunotherapy drugs these treatments can potentially create a response powerful enough to not only eradicate the presence of cancer but also to prevent it from returning because every 23 seconds someone in america is diagnosed with cancer the number of people affected is growing

rapidly the american cancer society estimates that nearly two million new patients will need treatment in the coming year judging by current trends and methods of treatment far too many of these people will be treated without the benefits of low dose chemotherapy and even less will enjoy the positive impact of immune supportive complementary integrative medicine rx for hope offers insight into a powerful way of treating cancer that patients and doctors can implement immediately for optimal results
