the exploration of the social conditions that facilitate or retard the search for scientific knowledge has been the major theme of robert k merton s work for forty years this collection of papers is a fascinating overview of this sustained inquiry there are very few other books in sociology with such meticulous scholarship or so elegant a style this collection of papers is and is likely to remain for a long time one of the most important books in sociology joseph ben david new york times book review the novelty of the approach the erudition and elegance and the unusual breadth of vision make this volume one of the most important contributions to sociology in general and to the sociology of science in particular merton s sociology of science is a magisterial summary of the field yehuda elkana american journal of sociology merton s work provides a rich feast for any scientist concerned for a genuine understanding of his own professional self and merton s industry integrity and humility are permanent witnesses to that ethos which he has done so much to define and support j r ravetz american scientist the essays not only exhibit a diverse and penetrating analysis and a deal of historical and contemporary examples with concrete numerical data but also make genuinely good reading because of the wit the liveliness and the rich learning with which merton writes philip morrison scientific american merton s impact

on sociology as a whole has been large and his impact on the sociology of science has been so momentous that the title of the book is apt because merton's writings represent modern sociology of science more than any other single writer richard mcclintock contemporary sociology

the process of aging is receiving an increasing amount of attention from behavioral scientists middle age and aging is an attempt to organize and select from the proliferation of material available in this field the selections in this volume emphasize some of the major topics that lie closest to the problem of what social and psychological adaptations are required as individuals move through the second half of their lives major attention is paid to the importance of age status and age sex roles psychological changes in the life cycle social psychological theories of aging attitudes toward health changing family roles work retirement and leisure certain other dimensions of the immediate social environment such as friendships neighboring patterns and living arrangements differences in cultural settings and perspectives of time and death

extensively revised and updated to reflect the current state of knowledge in the study of aging this fourth edition offers a complete profile of the aging process at all levels from molecules and cells to demography and evolution written by international experts in current basic and clinical aging research this text includes aspects of individual comparative and differential aging and discussions of theories and mechanisms of aging this invaluable reference illustrates how bodily systems organs and functions are affected with aging describes how genetic and environmental factors influence age related changes and addresses some of the clinical consequences of these changes for health and longevity well illustrated with numerous tables and graphs this book presents up to date information from internationally renowned experts in various bio medical fields

the population of asia is growing both larger and older demographically the most important continent on the world asia's population currently estimated to be 4.2 billion is expected to increase to about 5.9 billion by 2050 rapid declines in fertility together with rising life expectancy are altering the age structure of the population so that in 2050 for the first time in history there will be roughly as many people in asia over the age of 65 as under the age of 15 it is against this backdrop that the division of behavioral and social research at the u.s. national institute on aging nia asked the national research council nrc through the committee on population to undertake a project on advancing behavioral and social research on aging in asia aging in asia findings from new and emerging data initiatives is a peer reviewed collection of papers from china india indonesia japan and thailand that were presented at two conferences organized in conjunction with the chinese academy of sciences indian national science academy indonesian academy of sciences and science council of japan the first conference was hosted by the chinese academy of social sciences in beijing and the second conference was hosted by the indian national science academy in new delhi the papers in the volume highlight the contributions from new and emerging data initiatives in the region and cover subject areas such as economic growth labor markets and consumption family roles and responsibilities and labor markets and

consumption

this book attempts to unravel the fundamental assumptions of social philosophy and how its different concepts and theories make sense of human aging the book explores how biomedical ageing dominated thoughts on ageing until social understandings from different disciplines came about that highlighted that ageing could be understood in terms of social class gender and ethnicity a key debate in recent years has been the critical approach versus positive approach the final two chapters of the book explore foucauldian philosophy applied to instances of the ageing process whilst the final chapter advocates a focus on personhood and self actualisation

with advances and breakthroughs in modern medicine that are allowing people to live longer the number of older adults will continue to grow exponentially over the next several decades cardiologists geriatricians and other clinicians caring for the elderly will require at the very least a basic understanding of cardiovascular disorders that commonly affect the older patient in the fifth edition of tresch and aronow s cardiovascular disease in the elderly each chapter has been thoroughly updated to provide a comprehensive yet accessible overview of the epidemiology pathophysiology evaluation and treatment of cardiovascular disorders in older adults the book spans topics such as aging changes in the cardiovascular system risk factors and epidemiology for coronary artery disease valvular heart disease cardiomyopathies and heart failure arrhythmias cerebrovascular disease and other miscellaneous subjects the contributors supply evidence based recommendations with strong emphasis on new research findings new to the fifth edition numerous chapters comprehensively revised with new authors and or co authors summaries at the beginning of each chapter to facilitate easy reading discussion of the use of new antithrombotic agents in older adults important references in the bibliography highlighted for simplified access with contributions from recognized experts in the field this classic work continues to serve as the premier source on the evaluation and management of cardiovascular disorders in older adults

a comprehensive interdisciplinary introduction to the rapidly growing field of gerontology this book provides the psychological sociological and biological aspects of aging this respected book provides comprehensive coverage of gerontological issues while capturing the complexity inherent in the processes of aging emphasizes diversity in the experience of aging as a function of cultural social racial ethnic and individual variability takes a multidisciplinary approach provides many examples of aging in other cultures includes strong coverage of theories of aging contains classic research in gerontology as well as emerging conceptualizations and areas of research for anyone interested in the study of aging or gerontology

anyone who has watched a wrinkle slowly gouge their face like a strip mine or has been disturbed by a loss of memory has uncomfortably confronted the human ageing process the inexorable march of time on our bodies begs an important question why do we have to grow old written in everyday language the clock of ages takes us on a tour of the ageing human body all from a research scientist s point of view from the deliberate creation of organisms that live three times their natural span to the isolation of human genes that

may allow us to do the same the clock of ages also examines the latest discoveries in geriatric genetics sprinkled throughout the pages are descriptions of the aging of many historical figures such as florence nightingale jane austen bonaparte and casanova these stories underscore the common bond that unites us all they aged even as we do the clock of ages tells you why
