winner of both the national book award and the national book critics circle award and named by the modern library one of the twentieth century's 100 best non-fiction books Paul Fussell's *The Great War and Modern Memory* was universally acclaimed on publication in 1970. Today Fussell's landmark study remains as original and gripping as ever. A literate, literary, and unapologetic account of the Great War, the war that changed a generation, ushered in the modern era, and revolutionized how we see the world, this brilliant work illuminates the trauma and tragedy of modern warfare in fresh, revelatory ways. Exploring the work of Siegfried Sassoon, Robert Graves, Edmund Blunden, David Jones, Isaac Rosenberg, and Wilfred Owen, Fussell supplies contexts, both actual and literary, for those writers who, with conspicuous imaginative and artistic meaning, most effectively memorialized World War I as an historical experience, dispensing with literary theory and elevated rhetoric. Fussell grounds literary texts in the mud and trenches of World War I and shows how these poems, diaries, novels, and letters reflected the massive changes in every area, including language itself, brought about by the cataclysm of the Great War. For generations of readers, this work has represented and embodied a model of accessible scholarship, huge ambition, hard-minded research, and haunting detail. Restored and updated, this new edition includes an introduction by historian Jay Winter that takes into account the legacy and literary career of Paul Fussell, who died in May 2012.

Tracing Your Great War Ancestors: The Egypt and Palestine Campaigns is the first book explicitly aimed at helping the descendants of those who fought in this part of the Middle East find out more about their ancestors' actions, experiences, and achievements. Their wartime lives were very different to those who served on the Western Front, and yet have never before been explored from this angle. Hundreds of thousands of British and Imperial troops fought in the Western Desert, Sinai Desert, Palestine, the Jordan Valley, and Syria. They served in conditions quite unlike those more familiarly faced in France and Flanders, with everyday challenges to survival, including the heat, lack of water, hostile wildlife, and rampant disease. The fighting too was of a different character, with more open, sweeping campaigns across desert and mountains, and comparatively little systematic trench warfare, as well as giving the reader a vivid impression of the experience of wartime service in the region. Stuart Hadaway's handbook provides a guide to the main sources, archives, and websites that researchers can consult to get an insight into their ancestors' role and their contribution to the war effort.

Despair at Gallipoli, victory at Vimy Ridge, a European generation lost, an American spirit found: the First World War, the deadly herald of a new era, continues to captivate readers. In this lively book, Michael Neiberg offers a concise history based on the latest research and insights into the soldiers, commanders, battles, and legacies of the Great War. Tracing the war from Verdun to Salonika to Baghdad to German East Africa, Neiberg illuminates the global nature of the conflict. More than four years of mindless slaughter in the trenches on the Western Front, World War I was the first fought in three dimensions: in the air, at sea, and through mechanized ground warfare. New weapons systems, tanks, bomber aircraft, and long-range artillery all shaped the battle environment, moving beyond the standard portrayal of the war's generals as butchers and bunglers. Neiberg offers a nuanced discussion of officers constrained by the monumental scale of complex events. Diaries and letters of men serving on the front lines capture the personal stories and brutal conditions from alpine snows to Mesopotamian sands, under which these soldiers lived, fought, and died. Generously illustrated with many never-before-published photographs, this book is an impressive blend of analysis and narrative. Anyone interested in understanding the twentieth century

must begin with its first global conflict and there is no better place to start than with fighting the great war

a sweeping riveting history that manages to capture the essence of the conflict as well as the contributions of particular schools and individuals hmc insight magazine in this pioneering and original book anthony seldon and david walsh study the impact that the public schools had on the conduct of the great war and vice versa drawing on fresh evidence from 200 leading public schools and other archives they challenge the conventional wisdom that it was the public school ethos that caused needless suffering on the western front and elsewhere the authors argue that in general the young officers public school education imbued them with idealism stoicism and a sense of service while this helped them care selflessly for the men under their command in conditions of extreme danger it resulted in their death rate being nearly twice the national average this poignant and thought provoking work covers not just those who made the final sacrifice but also those who returned and whose lives were shattered as a result of their physical and psychological wounds it contains a wealth of unpublished detail about public school life before and during the war and how these establishments and the country at large coped with the devastating loss of so many of the brightest and best seldon and walsh conclude that 100 years on public school values and character training far from being concepts to be mocked remain relevant and that the present generation would benefit from studying them and the example of their predecessors
