who decides which facts are true in 1998 andrew wakefield a british gastroenterologist with a history of self promotion published a paper with a shocking allegation the measles mumps rubella vaccine might cause autism the media seized hold of the story and in the process helped to launch one of the most devastating health scares ever in the years to come wakefield would be revealed as a profiteer in league with class action lawyers and he would eventually lose his medical license meanwhile one study after another failed to find any link between childhood vaccines and autism yet the myth that vaccines somehow cause developmental disorders lives on despite the lack of corroborating evidence it has been popularized by media personalities such as oprah winfrey and jenny mccarthy and legitimized by journalists who claim that they are just being fair to both sides of an issue about which there is little debate meanwhile millions of dollars have been diverted from potential breakthroughs in autism research families have spent their savings on ineffective miracle cures and declining vaccination rates have led to outbreaks of deadly illnesses like hib measles and whooping cough most tragic of all is the increasing number of children dying from vaccine preventable diseases in the panic virus seth mnookin draws on interviews with parents public health advocates scientists and anti vaccine activists to tackle a fundamental question how do we decide what the truth is the fascinating answer helps explain everything from the persistence of conspiracy theories about 9 11 to the appeal of talk show hosts who demand that president obama prove he was born in america the panic virus is a riveting and sometimes heart breaking

medical detective story that explores the limits of rational thought it is the ultimate cautionary tale for our time

this Incs conference 4 volume set constitutes the proceedings of the 16th international conference on social networks analysis and mining asonam 2024 in rende italy during september 2 5 2024 the 33 full papers together with 36 short papers included in this volume were carefully reviewed and selected from 167 submissions the conference covers a wide spectrum of research contributions to the foundations and applications of social networks

in 1998 andrew wakefield claimed to have found a link between a common childhood vaccine and autism wakefield based his findings on a case study of just a dozen children and his methods and conclusions almost immediately came under fire rather than appealing to his colleagues however he went to the press who seized on the story of a maverick doctor standing up to the powerful pharmaceutical industry within months vaccination rates across europe and america had started to fall resulting in deaths from diseases previously thought to be disappearing the panic triggered by wakefields study is part of a much bigger story about fear myth and medicine decisions about childrens health have always aroused strong passions but the rise of alternative medicine and the internet have magnified such anxieties in the panic virus seth mnookin takes us inside the anti vaccination community and the medical establishment he examines how the anti vaccination movement spread and looks at a controversial australian case that exposed the claims and tactics of the movement to new scrutiny sorting fact from rumour mnookin confronts difficult questions with more information at our fingertips than ever why is our trust in science so fragile why did the anti vaccination movement take hold so quickly how to balance fact and intuition when it comes to decisions about health the panic virus is an extraordinary and gripping feat of research and reporting

notice to readers this is not the main book it is just a summary by olivia nathan it is not meant to replace the original book recap of the book canada s chief public health officer told people that if you choose to engage in an in person sexual encounter with someone outside of your household consider wearing a mask that covers the nose and mouth sure wearing a mask may lessen the transmission of the virus but let s be reasonable here if two people are together enough to engage in such intimacy a mask won t stop the spread of sars cov 2 the los angeles times performed a survey reporting only 42 percent of the people observed were wearing masks correctly with 10 percent wearing them

incorrectly and 47 percent not wearing masks at all calling it a mask rebellion so is it really a surprise that cases went up when over half of the population was not wearing masks as recommended if policymakers were going to force people to wear masks or even recommend it they had better be able to back up their actions with indisputable science to prevent further mask rebellion the researchers noted that not only do covid 19 cases decrease after mask orders are put in place but consumer mobility and spending increase after mask mandates are enacted so if we play with the numbers and factor in the people who did not wear a mask appropriately adding them to the group that didn't wear a mask then it's plausible there is up to a 57 percent increased risk of getting covid 19 if not wearing a mask or not wearing one appropriately which falls in line with other contemporary data get a copy of this summary to know more

in 1998 andrew wakefield published a paper containing a shocking allegation the measles mumps rubella vaccine might cause autism wakefield based his findings on a study of just a dozen children and his methods and conclusions immediately came under fire but the media seized on the story launching one of the most devastating health scares of modern times soon vaccination rates had started to fall eventually resulting in deaths from diseases previously thought to be disappearing wakefield was eventually stripped of his medical licence but the myth that vaccines cause developmental disorders lives on drawing on interviews with parents public health advocates scientists and anti vaccine activists the panic virus is a riveting and heartbreaking medical detective story that explores the limits of rational thought a cautionary tale of our time

buy now to get the main key ideas from nicole saphier's panic attack they said follow the science but what they meant was follow our politics in panic attack 2021 physician and author nicole saphier exposes the hypocrisy and hysteria that have marked so much of the american pandemic response for example she explores how politicians were applauded for allowing ill equipped nursing homes to accept covid patients resulting in a massive death toll in new york and new jersey the widespread politicization of science ranging from the origins of the virus to the simple concept of wearing face masks has hopelessly muddied the waters divided the country and exacerbated the situation with knee jerk anti trumpism despite many people's best and even noble efforts covid 19's overall landscape has been dominated by accident and force rather than reflection and choice fear panic personal ambition and anger have overwhelmed it as a result factual knowledge and the pursuit of truth that is founded on facts is jeopardized

in 1998 andrew wakefield published a paper containing a shocking allegation the measles mumps rubella vaccine might cause autism wakefield based his findings on a study of just a dozen children and his methods and conclusions immediately came under fire the media however seized on the story and so helped launch one of the most devastating health scares of modern times within months vaccination rates across the west had started to fall resulting in deaths from diseases previously thought to be disappearing wakefield eventually lost his medical licence yet the myth that vaccines cause developmental disorders lives on in the panic virus seth mnookin examines how the anti immunisation panic spread and looks at a controversial australian case that exposed the claims and tactics of the movement to new scrutiny sorting fact from rumour he confronts fundamental questions with more facts at our fingertips than ever why is our trust in science so fragile has the internet made us better informed or simply enabled panic to spread more quickly and how might we balance fact and intuition when it comes to decisions about children s health the panic virus is a riveting and sometimes heartbreaking medical detective story a gripping work of investigative journalism and a cautionary tale for our times
