this fully illustrated volume explores german military aviation during wwI through archival photographs and authentically detailed replicas fighter aircraft were developed during world war I at an unprecedented rate as nascent air forces sought to achieve and maintain air supremacy german manufacturers innovated at top speed while constantly scrutinizing the development of new enemy aircraft the germans also utilized the concept of modular engineering which allowed them to disassembled or reassembled their aircraft quickly in the field the pinnacle of their aeronautical innovations was the iconic fokker d vii the only aircraft specifically mentioned in the treaty of versailles which forbade germany from building it after the war german fighter aircraft in world war I explores how german fighter aircraft were developed during the war the advancements and trials that made the fokker d vii possible and the different makes and types of aircraft using unpublished images including photographs of surviving aircraft archive images and models and replicas this volume shows details of aircraft that were kept top secret during the war extensively illustrated with 140 photos and ten color profiles this is will be essential reading for all wwI aviation enthusiasts and modelers

this description of allied contingency plans for military operations in the middle east in the event of conflict with the soviet union argues that diplomatic events and

crises in the middle east in 1945 55 are understandable only in the context of assets sought by the allies in that region

the proposition that innovation is critical in the cost effective design and development of successful military aircraft is still subject to some debate and research indicates that innovation is promoted by intense competition among three or more industry competitors given the critical policy importance of this issue in the current environment of drastic consolidation of the aerospace defense industry the authors here examine the history of the major prime contractors in developing jet fighters since world war ii they make use of an extensive and database that includes nearly all jet fighters fighter attack aircraft and bombers developed and flown by u s industry since 1945 as well as all related prototypes modifications upgrades etc the report concludes that 1 experience matters because of the tendency to specialize and thus to develop system specific expertise 2 yet the most dramatic innovations and breakthroughs came from secondary or marginal players trying to compete with the industry leaders and 3 dedicated military r d conducted or directly funded by the u s government has been critical in the development of new higher performance fighters and bombers

once an obscure piece of world war ii history the tuskegee airmen are now among the most celebrated and documented aviators in military history with this growth in popularity however have come a number of inaccurate stories and assumptions misconceptions about the tuskegee airmen refutes fifty five of these myths correcting the historical record while preserving the airmen s rightful reputation as excellent servicemen the myths examined include the tuskegee airmen never losing a bomber to an enemy aircraft that lee archer was an ace that roscoe brown was the first american pilot to shoot down a german jet that charles mcgee has the highest total combat missions flown and that daniel chappie james was the leader of the freeman field mutiny historian daniel haulman an expert on the airmen with many published books on the subject conclusively disproves these misconceptions through primary documents like monthly histories daily narrative mission reports honor awarding orders and reports on missing crews thereby proving that the airmen were praiseworthy even without embellishments to their story

summary traces the development of air force aviation by examining specific types of fighter planes
