this series of lectures provides the basis for an entirely new psychology the first four lectures give a precise dynamic understanding of the human soul in relation to the activity of the senses and to the subtle processes that make up the human being on earth the next four lectures focus on what we can know of the human soul based on direct observation alone no theorizing takes place to show what we can know of soul life through the immediacy of engaged observation of oneself and others
rudolf steiner refrains from using his own higher capacities of clairvoyance to form a picture of our soul life the concluding lectures portray the relationship of soul life to spirit life showing us how to awaken individual spirit life and how to distinguish between illusory and

genuine spiritual experiences presented more than a century ago we might be tempted to think that insofar as psychology is concerned the content of these lectures are outdated it is also tempting to think that because steiner is not usually associated with the founders of modern psychology his efforts must be considered at best an interesting aside on the contrary these lectures are actually a wellspring for the true stream of psychology as the term itself means soul study a psychology of body soul and spirit should be read by anyone interested in psychology as well as by those interested in inner development whether we are involved in education medicine art drama economics or business the perspectives contained in this book have the potential to restore the frequently missing element of soul in psychology today robert sardello s in depth introduction places steiner s lectures in the context of modern life and psychology and provides insights into how to read and use this text for inner development and a deeper understanding of spiritual science contents introduction by robert sardello part 1 anthroposophy the human being and the senses supersensible processes in the human senses the higher senses inner forces and creative principles in the human organism supersensible currents group soul and the i in human beings and animals part 2 psychosophy aspects of soul life the activities of human soul forces the senses feeling and aesthetic judging consciousness and soul life part 3 pneumatosophy franz brentano and aristotle s doctrine of the spirit truth and error in light of the spiritual world imagination imagination inspiration self fulfillment intuition conscience nature the evolution of consciousness and reincarnation steiner does not talk about soul he speaks from soul that is the entire method there is however an entrance fee for doing psychology the fee is that you need to leave behind your well known to you self identity you must suffer the experience of leaving behind not only what you know but also what you think you know of yourself this requirement qualifies psychology as integral to the work of initiation robert sardello from his introduction a previous translation of these lectures were published as anthroposophy psychosophy pneumatosophy and as wisdom of man of the soul and of the spirit this volume is a translation from german of anthroposophie psychosophie pneumatosophie ga 115

in this day of the revival of spiritism when so many through the loss of loved ones in the great world war are longing to communicate with the dead and are resorting to forbidden means to that end a day in which science is trying to discover whether there is another world than this and whether men live after death and if so can they communicate with the living it seems timely that a book should be written to show what the holy scriptures have revealed of the world of spirits the bible has much to say about the spirit world and if we will carefully search its pages we shall know all there is to be known in this life of the world to come for if men will not listen to moses and the prophets they will not be persuaded though one rose or came back from the dead luke 16 31 foreword
