in the dismantling of the ottoman empire following world war i nearly two million citizens in turkey and greece were expelled from homelands the lausanne treaty resulted in the deportation of orthodox christians from turkey to greece and of muslims from greece to turkey the transfer was hailed as a solution to the problem of minorities who could not coexist both governments saw the exchange as a chance to create societies of a single culture the opinions and feelings of those uprooted from their native soil were never solicited in an evocative book bruce clark draws on new archival research in turkey and

greece as well as interviews with surviving participants to examine this unprecedented exercise in ethnic engineering he examines how the exchange was negotiated and how people on both sides came to terms with new lands and identities politically the population exchange achieved its planners goals but the enormous human suffering left shattered legacies it colored relations between turkey and greece and has been invoked as a solution by advocates of ethnic separation from the balkans to south asia to the middle east this thoughtful book is a timely reminder of the effects of grand policy on ordinary people and of the difficulties for modern nations in contested regions where people still identify strongly with their ethnic or religious community

the making of refugee memory is the first english language history to address the way in which asia minor refugees in the period 1912 1924 sustained their memories of their lost homeland in the context of their new locations in the state of greece building on the previous work of historians and sociologists in relation to the anatolian catastrophe emilia salvanou provides an original in depth case study of the thracian centre and its work in supporting and encouraging the identities of refugees by means of the journal thrakika and other conduits of memory it is a notable ground breaking addition to the historiography of modern greece and the perception of the status and meaning of refugees in the post imperial world

a definitive global survey of the interaction of ethnicity nationalism and politics this handbook blends rigorous theoretically grounded analysis with empirically rich illustrations to provide a state of the art overview of the contemporary debates on one of the most pervasive international security challenges today fully updated for the second edition the book includes a new section which offers detailed analyses of contemporary cases of conflict such as in ukraine kosovo the african great lakes region and in the kurdish areas across the middle east thus providing accessible examples that bridge the gap between theory and practice the contributors offer a 360 degree perspective on ethnic conflict from the theoretical foundations of nationalism and ethnicity to the causes and consequences of ethnic conflict and to the various strategies adopted in response to it without privileging any specific explanation of why ethnic conflict happens at a particular place and time or why attempts at preventing or settling it might fail or succeed the routledge handbook of ethnic conflict enables readers to gain a better insight into such defining moments in post cold war international history as the disintegration of the soviet union and yugoslavia and their respective consequences the genocide in rwanda and the relative success of conflict settlement efforts in northern ireland by contributing to understanding the varied and multiple causes of ethnic conflicts and to learning from the successes and failures of their prevention and settlement the handbook makes a powerful case that ethnic conflicts are neither unavoidable nor unresolvable but rather that they require careful analysis and thoughtful and measured responses

the history of the relationship between the iraqi baath party and the faylee kurds an integral part of the kurdish nation provides ample evidence of insecurity and large scale violations of fundamental human rights the baathists employed different strategical

methods against the faylee kurds ranging from discrimination and social exclusion on the one extreme to mass expulsion and genocide on the other they justified their systematic prosecution and repression of one of the main components of the iraqi society on the basis of national security the animosity towards the faylee kurds intensified during the rule of saddam hussein as they were accused of being of iranian origin and constituting a fifth column in iraq and hence a threat to be removed as a result the baath regime expelled hundreds of thousands of faylee kurds to iran and exterminated about 22 000 of them the faylee kurds have lived in iraq for centuries and played a significant role in the history of modern iraq and most notably for being expelled and killed on a vast scale yet they are still an unknown community to the outside world this book attempts to address this shortcoming from the introduction cover photo monument in baghdad honouring the killed and disappeared faylee kurds

shows which historical developments led people to start describing themselves and others as minorities through close attention to what changed in french mandate syria and what those changes entailed benjamin white argues for a careful reappraisal of the term minority within a few years of world war i the term had become fundamental to public understandings of national and international politics law and society minorities and majorities were taken to be an objective reality both in the present and the past in syria the mandate period saw the consolidation of the nation state form despite french attempts to create territorial political and legal divisions there was a trend towards a coherent national territory with fixed borders and uniform state authority within them while the struggle to control the state was played out in the language of nationalism developments in the post ottoman levant that closely paralleled events in europe at the same time following the demise of the austro hungarian and tsarist empires through close attention to what changed in french mandate syria and what those changes meant the book argues for a careful rethinking of a term too often used as an objective description of reality

the greco turkish war 1919 1922 in asia minor and the population exchange that followed led to the forced displacement of more than 1 5 million people who became entangled in the nation building processes of both greece and turkey this book examines the memories that shaped asia minor refugee identity focusing on the ways in which these memories continue to reverberate in contemporary greek culture it explores how memories of asia minor frame wider social debates foster affective alliances inform different notions of belonging and provide a toolkit for addressing contemporary concerns taking the reader across a wide range of cultural works history textbooks comics theatre documentary and fiction films news footage and photography the book shows how these works have become means for individuals and communities to contribute to the process of history making while keeping its focus on present day greece memories of asia minor joins wider global debates over contested pasts legacies of war and refugeehood

expert scholars in the field come together to look at the impact of political boundaries upon the region along with pressures from european and economic integration the resurgence of nationalism and refugee and security concerns the authors explore the politics of memory the ways in which the past shapes conflicts in the present but also how memories held by individuals and communities challenge master narratives of us versus them turning to the present the book investigates how political fragmentation and divisive identities manifest in territorial borders influence everyday lives rather than a clear cut boundary between north and south the vision that emerges is of a mediterranean transformed by the forces of globalization into a set of hybrid frontiers borderlands shaped by intertwined exchanges identities and conflicts book jacket
