the editors of the third edition of the seminal textbook understanding and applying medical anthropology bring it completely up to date for both instructors and students the collection of 49 readings 17 of them new to this edition offers extensive background description and exposes students to the breadth of theoretical methodological and practical perspectives and issues in the field of medical anthropology the text provides specific examples and case studies of research as it is applied to a range of health settings from cross cultural clinical encounters to cultural analysis of new biomedical technologies and the implementation of programs in global health settings the new edition features a major revision that eliminates many older readings in favor of more fresh relevant selections a new section on structural violence that looks at the impact of poverty and other forms of social marginalization on health an updated and expanded section on conceptual tools including new research and ideas that are currently driving the field of medical anthropology forward such as epigenetics and syndemics new chapters on climate change ebola ptsd among iraq afghanistan veterans eating disorders and autism among others recent articles from margaret mead award winners sera young seth holmes and erin finley along with new articles by such established medical anthropologists as paul farmer and merrill singer

this collection of 49 readings with extensive background description exposes students to the breadth of theoretical perspectives and issues in the field of medical anthropology the text provides specific examples and case studies of research as it is applied to a range of health settings from cross cultural clinical encounters to cultural analysis of new biomedical technologies to the implementation of programs in global health settings

a companion to medical anthropology examines the current issues controversies and state of the field in medical anthropology today provides an expert view of the major topics and themes to concern the discipline since its founding in the 1960s written by leading international scholars in medical anthropology covers environmental health global health biotechnology syndemics nutrition substance

abuse infectious disease and sexuality and reproductive health and other topics

this anthology of readings exposes students to the breadth of theoretical viewpoints and issues in the field of medical anthropology it provides specific examples and case studies of research as it is applied in a range of health settings from clinical encounters to preventive services to international health

like other collections of papers related to a single topic this volume arose out of problem sharing and problem solving discussions among some of the authors the two principal recurring issues were 1 the difficulties in translating anthropo logical knowledge so that our students could use it and 2 the difficulties of bringing existing medical anthropology literature to bear on this task as we talked to other anthropologists teaching in other parts of the country and in various health related schools we recognized that our problems were similar similarities in our solutions led the editors to believe that publication of our teaching experi ences and research relevant to teaching would help others and might begin the process of generating principles leading to a more coherent approach our colleagues supported this idea and agreed to contribute what we agreed to write about was clinically applied anthropology much of what we were doing and certainly much of the relevant literature was applied anthropology and our target group was composed mostly of clinicians the utility of the term became apparent after 1979 when another set of anthropologists began to discuss ainical anthropology they too recognized the range of novel be haviors available to anthropologists in the health science arena and chose to focus on the clinical use of anthropology we see this as an important endeavor but very different from what we are proposing

in the past ten years medical anthropology has come into its own as a flourishing sub discipline within anthropology with an expanded research agenda and sophisticated methodology this handbook offers both an introduction for those not trained in the field and a state of the art survey encompassing the range of theoretical orientations research findings and methods that characterize the discipline as it moves into the 1990s each of the nineteen chapters explores recent developments in a major subarea of medical anthropology and speculates about directions for future research and theoretical exploration the chapters are arranged in five sections the first of which addresses core issues covering the breadth of current theoretical concerns the sections that follow treat other aspects of medical anthropology including a range of medical systems and approaches the most recent trends in the crosscultural study of health and healing medical dimensions of the interaction of populations with the natural and cultural environment research methods and some of the most pressing policy and advocacy issues confronting medicine today

this supplementary reader is composed of both classic and contemporary articles that demonstrate the significant contributions that cultural anthropologists make the emphasis is on the applicability of cultural anthropology to understanding and improving the present day human condition
