handbook of economic expectations discusses the state of the art in the collection study and use of expectations data in economics including the modelling of expectations formation and updating as well as open questions and directions for future research the book spans a broad range of fields approaches and applications using data on subjective expectations that allows us to make progress on fundamental questions around the formation and updating of expectations by economic agents and their information sets the information included will help us study heterogeneity and potential biases in expectations and analyze impacts on behavior and decision making under uncertainty combines information about the creation of economic expectations and their theories applications and likely futures provides a comprehensive summary of economics expectations literature explores empirical and theoretical dimensions of expectations and their relevance to a wide array of subfields in economics

statistics is the branch of mathematics that deals with real life problems as such it is an essential tool for economists unfortunately the way the concept is introduced to students is not compatible with the way the economists think and learn the problem is worsened by the use of mathematical jargon and complex derivations however as this book demonstrates neither is necessary the book is written in simple english with minimal use of symbols all the examples and exercises in the book are constructed within the field of economics thus eliminating the difficulty of learning statistics with examples from fields that have no relation to business politics or policy statistics is not more difficult than economics anyone that can comprehend economics can understand and use statistics successfully the book utilizes microsoft excel to obtain statistical results as well as to perform additional necessary computations although the excel spreadsheet is not the software of choice for performing sophisticated statistical analysis it is widely available and almost everyone has some degree of familiarity with excel

the journal was founded to promote and publish the analysis of modern industry it publishes innovative work on industrial organization functioning of markets behaviour of firms and policy it covers all areas of industrial economics including organization of industry and applied oligopoly theory product differentiation and technical change theory of the firm and internal organization regulation monopoly merger and technology policy

the purpose of the review is to promote the collection criticism and interpretation of economic statistics with a view to making them more accurate and valuable than they are at present for business and scientific purposes

introducing mathematical analysis to business economics and social science students this text begins with non calculus topics such as equations functions linear programming and probability the work then progresses through both single variable and multivariable calculus

this fourth edition of public economics provides a comprehensive yet easy to read introductory text to the study of public economics within a south african and southern african context the book includes additional self assessment exercises and interesting comments in each chapter which emphasize topical issues it has also been updated to feature the latest in sa economic policy
