functional programming is a relatively new area of computer science
 these proceedings contain 25 papers representing an excellent snapshot
 of the current state of functional programming and are written by the
 leading computer scientists in this area in some universities a
 functional programming language is used as the introductory teaching
 language and computer architectures are being designed and
 investigated to support functional languages

designing is one of the most significant of human acts surprisingly
 given that designing has been occurring for many millenia our
 understanding of the processes of designing is remarkably limited
 recently design methods have been formalised not as humano centred

processes but as processes capable of computer implementation with the goal of augmenting human designers this volume contains contributions which cover design methods based on evolutionary systems generative processes evaluation methods and analysis methods it presents the state of the art in formal design methods for computer aided design
