Guiding students through a virtual clinical experience, VCE Red Rock Canyon Medical Center is a teaching hospital that is modeled after a real medical-surgical floor. It contains five patient rooms, a nurses station, a supervisor's office, two conference rooms, a nurses lounge, and a waiting room with an elevator. The following patients are seeking treatment in Red Rock Canyon Medical Center:

- Carmen Gonzalez:** This older Hispanic female presents with an infected leg that has become gangrenous. She has type 2 diabetes mellitus as well as complications of congestive heart failure and osteomyelitis.
- David Ruskin:** Following a car/bicycle accident, this young adult African American male is admitted with a possible closed head injury and a badly fractured right humerus. He undergoes an open reduction and internal fixation of the right humerus.
- Sally Begay:** This Native American woman enters the hospital and is initially suspected of having a hantavirus infection. She has a confirmed diagnosis of bacterial lung infection. This client's complications include chronic obstructive pulmonary disease and inactive tuberculosis.
- Ira Bradley:** Ira is a Caucasian adult male with late-stage HIV disease who is admitted for an opportunistic respiratory infection. He has complications of oral fungal infection, malnutrition, and wasting.
- Andrea Wang:** This young Asian female entered the hospital after a diving accident in which T6 is crushed with partial transection of the spinal cord. After a week in the ICU, she has been transferred to the medical-surgical unit where she is being closely monitored.

The program includes a guided tutorial which shows students how to work with a patient in the virtual hospital, collect patient data from various sources, reports, charts, medication administration record, short video clips, and audio clips of nurse-patient interactions. Record patient data, listen to a report, and itemize a patient's problems and high-priority concerns. Sometimes administer medications. Requires students to use their critical thinking skills to set priorities for care, collect data, analyze and interpret data, and reach conclusions about complex problems within a health-illness transition. Encourages active learning and provides opportunities to identify information to collect and process data for evidence-based patient care. Work with data entry and retrieval screens, optimize use of available information resources, understand hospital information systems, manage information for decision making, and maintain and improve core computing skills. A series of groundbreaking new workbooks and CD-ROMs, Virtual Clinical Excursions, bring learning to life.
